Flans of Committee.

The committee's procedure, as announced tonight by Governor Aldrich, will be to go before the Supreme Court in their capacity as Governors, and plead that the inferior federal courts are medding dangerously.

They will ask the Supreme Court to unset Justice Sanborn's decision in the Minnesota rate cases now before the Supreme Court on Appeal, and will be prepared, so Aldrich says tonight, to lay before Chief Justice White and the associate justices, evidence that Justice Sanborn decided the case against a preponderant weight of expert opinion and conclusions. Argument will be made by all three, said Aldrich.

The committee hoped, he said, to set a reversai in the Minnesota cases, but its chief aim was to impress the suppeme Court that State Governors are aroused over the nutilifying by desiral courts of State rights.

The Supreme Court itself, to which he Governors will appeal, was charged with having done precisely the same thing that the inferior courts have done. But this trifling increpancy did not seem to bother the valiant three.

Governor Aldrich said, in part:

We are clizens of a nation whose overnoral direction of law, to no other country does the law soulk a language so emphatic and mergiliocal. The basis, origin and all-predominating force of this pow-

Notice to Employers.

As a consolation to the employers who settled yesterday and who may settle with the union before a general sextlement is reached, the union yesterday issued a statement to the comployers saying that any concessions made by the union to any group or association of manufacturers within one month from the day of the settlement will also be made to the signers of the present agreements. This, it is believed, will cause a number of large houses that are not members of the association to grant the demands of the strikers, as many bosses who are willing to settle have refrained from doing so, figuring that the association would soon go into conference with the union and try to get concessions which would also apply to the non-members.

The employers are so alarmed over the success of the walkout of the tailors that many remarked yesterday that the bosses would have never allowed the strike if they had thought that the men were so loyal to the union, and there would be such a unanimous response of the workers.

Sol Rosman, organizer of the tailors, said yesterday that the bosses purposely let the strike be called in order to show their customers that they had to raise the wages of their employes, and hence must charge higher prices for their gowns.

There was talk yesterday of calling out on strike the custom tailore employed in the department stores, pair is expected that finding they can't

Little Doubt That Germany Will Accept French Original Demands.

BERLIN, Sept. 14 .- The protracted negotiations between France and Germany, with England and Russia in the background backing France, have thrown the Bourse here into a condition bordering on panic, all market prices having declined heavily, and point. Unless a settlement of the dispute is reached without delay a panic is feared that may absolutely ruin Germany.

Unlike her rival, England, Germany has been obliged for many years past to raise loans in order to meet her ditures, and, while in ordinary times Their task was to prevent war, which he was convinced would lead to no solution of the present burgher women who remained at work on that question does arise in a time of

ance with historical tradition.

The fact is that the time has passed when a king can rule alone in Europe. Germany's policy might have been safe some twenty years ago, but ahe is no longer able to ignore her people as before. The Social Democrate insist in being heard, and, though the Reichstag, owing to an injequious electoral system, their power outside is undisputed. The Kaiser and his friends, the Mannesmans, to secure whose Moroccan concessions all the trouble has arisen, have a revolution to fear as well as national bankrupter.

For these reasons there is no dobbt in the minds of those who credit the Kaiser and his friends with an atom of sense that within a few hours a settlement will be reached and that France will this time emerse the diplomatic victor.

It is understood that the Foreign Office hers has received by courler the French reply, and that it is similar in its trins to her original proposals a membrandum of proposals to Minister Jules Cambon here, ordering him to adhere strictly to basic principles.

Taking a Big Fall OF LADIES' TAILORS Out of Prices for Men's Clothe

No man who trades at this store can ever have any kick about the cost of keeping well dressed.

Here is one place where from \$12.50 to \$25.00 will put a suit on your back that will make you look as prosperous as a

About the same amount will get you as good an overcoat as any man except a fop or a dude could want to own.

And from \$1.50 to \$3.00 will put a dandy hat on your head.

You see we have knocked the props out from under high prices-have done it by doing away with the pomp and show and frills and other four-flushing extravagances which run expenses way up at most stores, and which such stores pay for by boosting prices.

In buying clothes it's pretty much like renting an apartment. If you pick out a flat in a fashionable building—in a high-toned, aristocratic neighborhood on a rich-man's boulevard where lots come high-a building with spacious marble or onyx halls, elevator hallboy and other flunkeys-you'll find the

But if you pick out a flat, in a less pretentious building—without all that costly show and flub-dub, etc.—you'll get just as good an apartment for about one-half as much rent.

And so with clothing. If you buy on Broadway or some other "show" street, where rents are way up, where they have to keep up appearances, where they want Get-Rich-Quick profits, etc., you have to help pay for it—by paying 20% to 30% more than you should for the suit you get.

But we've eliminated all that extravagant waste— our rent is very small compared with Broadway rents— we have pleaty of daylight and therefore very little expense for electric light—we've cut out all unneces-

sary expense of every kind—we are satisfied about one-third the profit most stores insist on—we buy for seven stores, thus getting big discentrom regular wholesale prices—that's why you'll our prices from 20% to 30% lower than at others.

Another thing—if for any reason you're not it oughly satisfied with anything you buy here, you always get your money back.

Became Worthless.

A suit brought against John Gerken,
President of the Hudson Trust Company, by Mrs. Margaret Roche, formerly in his employ as a servant, was
before Supreme Court Justice Pendieton yesterday on an application by
Gerken to dismiss the suit.

The plaintiff, who is a widow, asks
for \$1,000 and interest from October,
1902, saying that at that time she had
the money in a savings bank. She
says she intrusted Mr. Gerken with
the money to deposit it for her in the
United National Bank, of which he
was then president, but instead of
depositing the money he invested it
in stock of the Waubun Cafe Company, of which he was an officer. He
gave her the stock, but the stock late
hecame worthless.

Counsel for Mrs. Roche said that he
would try the case as soon as possible and that at present Mrs. Roche
is destitute and is living in a hut and
has been supporting herself and a
consumptive son by doing washing.
The lawyer said that when Mrs.
Roche's money was put in Gerken's
hands her frusband was employed by
him as a coachman, while Mrs. Roche
was also employed in the household.

Mrs. Gerken is a noted horsewoman
and has been a conspicuous figure at

shows.

AND NOW FIGURES SHOW "WETS" WON

AUGUSTA. Me.. Sept., 14.—According to complete returns given out semi-officially at the State House today the wets have won their fight for the repeal of the constitutional prohibitory amendment by 134 votes. The vote as announced at the States House is: Wet, 69,517; Dry, 69,-383.

PORTLAND, Me., Sept. 14.—Returns received at the office of the Secretary of State today, with only six towns missing, and these six supplied by returns received in Portland, showed: For repeal of prohibition, 60,517; against repeal, 60,383, Majority for repeal, 134.

If the figures received in Portland from the towns of Limestone, Marinicus Isle and Topsfield, which have been shown to be reversed, as compared with those received in Augusta, are allowed, they will show a victory against repeal of 330.

Meantime Small Boy Is Arraigned Charged With Terrible Crime.

Mayor Gavnor had this to say yesterday regarding the Sullivan law, concerning the interpretation of which there has been so much uncertainty: "Except in the case of foreigners this act relates only to firearms small enough to be concealed on the person. It says so in plain terms. Whether it covers having a pistol in your own house I wouldn't like to say."

sny."

The Sullivan law, according to the Mayor's interpretation, prohibits aliens from carrying firearms of any description, but permits citizens to carry such weapons as rifles and shot-

description, but permits citizens to carry such weapons as rifles and shotguns. It was pointed out that, while the Sullivan law prohibits an alien from carrying a shotgun or rifle, the State issues a license permitting an alien to use such weapons in hunting, the only discrimination against the foreigner being that he is charged a license fee of \$20.50, while a citizen who is a taxpayer in New York State can get his license for \$1.15 and a citizen who pays no taxes in this State is charged \$10.50. The Mayor did not attempt to solve this apparent clash between the two laws.

A very small boy was arraigned in the Children's Court yesterday on the charge of carrying a very large revolver. It was the first case under the Sullivan law to come up in that court. The boy, Samuel Richardson, told Justice Hoyt that he was a waiter employed in a boarding house. Yesterday the cook's husband called. In the course of the visit, the boy said, there was a quarrel and the man drew a revolver. The cook took the weapon from the man, and after she had put him out, gave it to the boy and told him to take it to her home. Richardson said he put the revolver in his inside pocket, but the wind blew his coat open and the revolver fell to the street. It was seen by Patrolman Jones, who arrested the boy, Justice Hoyt remanded him until Monday and directed the agents of the Children's Society to investigate the story.

FIREARMS MAY BE BARRED FROM STRIKES

Leonard B. Smith, a lawyer, with offices at 49 Wall street, who is a lergeant in Squadron A. National Guard, and a member of the pistol Guard, and a member of the pistor team, said in an interview yesterday that the law had been so carelessly drawn that the only judicial construction the militiamen could expect would be a restriction of all use of threarms in pistol practice, and per-

would be a restriction of all use of itrearms in pistol practice, and perhaps even on strike duty.

"The law is outrageous in what it actually does prohibit," said Smith. "I know that it is the opinion among nearly all the men of the National Guard that they are guilty of a felony in engaging in pistol practice, or even in owning and keeping at their homes the pistols for such use. Why, in failing to exempt the militiamen from the operation of the law any one might attack in courts their right to carry such arms in time of police duty, in the event of riot, or such disturbance."

Leaders Take Fourth Straight Gam From Boston Rustlers, While Cubs Are Loosing Two.

BOSTON, Sept. 14.—The Giants this afternoon made it four straight from the Bostons in a game of queer twists and freakish angles. There was heavy scoring in the last two innings. heavy scoring in the last two limings, and those two sessions consumed as much time as the other seven put together. The Giants were in front all the way, but the six runs they herded home in the ninth inning didn't turn out to be as superfluous as they looked to be at the time. In fact, they proved to be decidedly useful. for the Rustlers, likely at any time to break up a game with their bats, bombarded Crandall in the ninth and the Giants simultaneously inject-

and the Giants simultaneously injected a good sized crop of errors. However, the big lead of the visitors
pulled them through safely.

McGraw figured that if he could
get by this game with Wiltse in the
box he could use Mathewson against
the Pirates on Saturday. Wiltse, after going along swimmingly up to that time, was knocked out in the seventh. He doesn't seem able to weather a full game. But McGraw's plans for Saturday were not upset. They not have to be revised, for it was They will essary to use Matty only two-thirds of an inning, and things have so broken up here that he has pitched only two and two-thirds innings in this

As soon as the New York s piece of their six runs in the ninth Matty was taken out. The second half of the soon as the New York's piled up ninth brought some pangs of uneasi-ness, and it looked as if McGraw would have cause to regret taking Matty out; but in due time the Bostons were retired while still a respect-able number of runs in arrears.

One defeat on the score board for the Cubs and another in process of formation inspired the Giants to mus-cular bat work, and they pounded three Boston pitchers with untram-melled gusto. Having increased their lead oven Chance's men to four games, the Giants left for Pittsburg tonight in fine humor. They will reach Pittsburg tomorrow in time to see the second battle between the Cubs and Pirates. The score:

GIANTS STILL WINNING | MORRIS AND FLYNN BATTLE TONIGHT

BAITLE IONIGHT

The long talked of boxing contest between Carl Morris, the Oklahoma siant, who is looked upon as the possible successor to Jack Johnson's title, and Jim Fiynn, the Pueblo fireman, who sprang into prominence recently by a decisive victory over Al Kaufman, is to take place tonight at Madison Square Garden. Not since the day when all the world's greatest ring heroes battled for honor in New York has a contest between heavy-weights created so much interest in the sporting world.

The articles for the match call for a ten round "no decision" contest, the men to wear five ounce gloves and to box straight Marquis of Queensbury rules, one hand free, protect themselves at all times. Charlie White has been selected to be the third man in the ring.

Tonight's match was originally carded to take place at Tulsa, Okla. on July 4 last, but at the last moment was stopped by the Governor of that State. Morris history and a review of his ring engagements show him to be above the ordinary. He has engaged in seven contests in his short ring career and won them all inside of six rounds by the knockout route. While none of the men he defeated stood in the first rank, he has done everything and more than has been asked of him. Morris is six feet four inches tall. He is 24 years old and was born in Kentucky. He was a soldler in the Philippines and it was there that he developed his boxing ability, as he beat every one of the army's glove champions. Flynn has been boxing for the lasten years and has met every great puglist of his time, including Jack Johnson, but has been regarded as something of an "in and outer." as he has lost and won from the sam men. Sam Langford and Al Kaufman being two notable cases. He is a sturdy, strong, rushing buildog sort of fighter, much on the style of Tom Sharkey. He will enter the rins weighing about 180 pounds; while Morris will tip the scales close to 230.

NITCHIE AND LOUGHREY FIGHT CLOSE BATTLE

Young Nitchie and Frank Loughrey, both of Philadelphia, in their ten-round contest last night contributed to the pleasures of the spectators at the National Sporting Club in a merry exchange in, which fists flew around each other as plentifully as flies about sweets on a mid-summer day. The bout ended with meither much damaged. While Lougnrey landed easily two blows to the other's one the power behind them falled to stop Nitchie from coming back, Le showing utter disregard for the attack and fighting in return as well as he could. Loughrey's leftiabs and right swings flew off him like drops of water.

jabs and right swings flew off him like, drops of water.

Nitchie deaft swings to the siomach and occasional rights to the law which, if only possessed of more steam, would have done serious damaze. Loughrey was enabled to continue his walloping to his heart's content, but failed to do much harm because of his townsman's rugged physique. "Brotherly love" manifested itself often during the conflict, the one always willing to succor the other when mishaps such as sippoing, unintentional low hitting, etc., occurred.

GOV. CRUCE SURPRISED. Wonders at Our Allowing Morris Flynn Scrap.

Flynn Scrap.

SPRING LAKE, N. J., Sept, 13.—

Nothing which has so far happened at the Governors' Conference, now in session here, has interested Governor Lee Cruce, of Oklahoma, half as much as the fact that New York City will permit Carl Morris, the origina "white hope," and Fireman Jim Flynr to maul each other tomorrow night in Madison Square; Garden. He just learned of it today.

"It is almost beyond belief," he said.

"It is almost beyond belief, he said.

Governor Cruce refused to permit the same fighters to box at Sapulpa Okla., some months ago, and went a far as to order out the militia. He practically stood alone at first in his determination that the fight must not take place.

CUBS LOSE TWO GAMES.

Pirates Help Giants by Trouncing Chi cagoites Twice.

PITTSBURG, Sept. 14 .- The Pi rates boosted the Giants' pennant stock considerably this afternoon by trouncing the Cubs in both games of the double header. Pittsburg fought desperately against the enemy of old, and Chance's men dropped two of the bitterest, scrappiest and hardest bitterest, scrappiest and hardest played games of the season on Forbes Fred Clarke was the brilliant indi

vidual star. His double and a home run sewed up the first game. Brown and Camnitz pitched splendid ball, but NO 20th CENTURY SHOW TONIGHT the Kentucky rosebud had a shade on Mordecal. Leifield's slow ball was poison to the Cubs in the second game. He pitched shutout ball until the ninth when he lost control of the wet ball and two Cubs crossed the plate in a driving rain. Pittsburg, however, found Richie, McIntyre and Richter for four runs. Wagner, Wil-son and Clarke bolstered up the Pi-rate forces considerably. The Cubs and Pirates clash in another double header tomorrow. The score: FIRST GAME.

The 1017th Edition of The Call and | | LL, COAL STRIKE AIDED IOWA BOSSES

While Mines in One State Were lale, Those in Other Made Profits.

WASHINGTON, Sept. 14 .- The total production of coal in lows in 1910 wa, 7,928,120 short tons, valued at \$13,963,913, an increase of 170,358 tons in quantity and of \$1,110,285 in value over the figures for the preced-ing year, according to a statement just issued by E. W. Parker, coal statistician of the United States Geological Survey.

The benefit derived by Iowa coal operators from the strike in the Illi-

nois field was principally in eliminating the competition of illinois coal from the comparatively local markets. which are the natural territory of the lowa mines. Coal operators in Iowa have complained that Illinois coal has more favorable freight rates than those accorded to Iowa coal, and that the mining rates originally fixed to compensate differences, in freight charges have not been changed when charges have not been changed when freights on Illinois coal were reduced, so that the Iowa mines have been placed at a disadvantage. The statistics for 1909 indicated an improvement in these conditions, for the production was the largest in the history of the State, and prices were the highest in recent years.

In 1910 the idleness in Illinois reacted upon the Iowa production more

Propaganda in Labor Unions.

The necessity of propaganda amonitated unionists is obvious to every socialist. The question of "how to deating the "regular" Socialist. The question of "how to reach them" occurs from time to time. Party members have agreed that a plan for united action is necessary. For this purpose a meeting of party members who belong to trade unions discovered that an unusually large will be held on Saturday. September to work the independent voters of the City of Gloversville was there such a large vote cast at the polls, each ticket having quite a number of workers urging the voters to cast their votes for their votes to cast their votes for their votes would be cast. In fact, never in the history of the City of Gloversville was there such a large vote cast at the polls, and the Labor Temple, was there such a large vote cast at the voters becaused.

The Socialists here decided that it is about high time to put a stop to this farce. Quietly the word was passed around among the workers in various shops of Gloversville that the caslest way to select a School Board which would represent the interests of the toilers was to attend in a body this so-called non-partisan caucus and conceded the election of the "resular" Socialist ticket. This time they guessed right, as can be seen from the following tabulated vote:

candidates for the four places on the
School Board to be filled at the election. Four of those named were the
tools of the two old parties and four
were known to be the nominees of
the Socialist party. A vote was taken
and the Socialists candidates received
about 125 yotes, while the candidates
favored by the administration only received 23 votes. This made the candi-

relived 25 votes. This made the candidates of the Socialists the "regular" nominees of the caucus.

SOCIALISTS ELECT

A SCHOOL BOARD

The caucus and accused the Socialists of having "injected party politics in the fortheoming school elections." At the same time the citizens were urged to call another caucus for the purpose of putting forward other candidates. Such a caucus was held at the Kingsborough Hotel, attended by the old timers and the four candidates defeated at the "regular" caucus were named as candidates on a so-called "Citizens" Ticket."

Thus it happened that Gloversville was blessed with two tickets at the school elections, the papers, of course, blaming the Socialists for it as had they attended the caucus and interposed no objections to the naming of the slate, selected by the administration one ticket would have been enough. Of course the newspapers consoled themselves with the deat that it would be impossible for the Socialists to carry the election as their normal strength is only about the socialists to carry the election as their normal strength is only about the socialists to carry the election as their normal strength; so only about the socialists to carry the election as their normal strength; so only about the socialists to carry the election as their normal strength; so only about the socialists to carry the election as their normal strength is only about the socialists to carry the election as their normal strength is only about the socialists to carry the election as their normal strength. victory, on account of the fact that voting was not by party, at the same time the regular candidates were advertised by the newspapers here as the Socialist ticket, and their defeat was urged on that account. The victory, therefore, can justly be considered as a Socialist victory and the Comrades in Gloversville are greatly elated with the result.

The New York State Executive Committee of the party advised against participating in this caucus; the Gloversville (Comrades, however, contend that the election being held on nonpartisan lines it was impossible to bring the attention of the voters to the Socialist party in any other manner than by capturing the caucus and compelling, the so-called "respectables" of the city to put up a ticket against the one selected by their own caucus. All the newspapers here have heralded the outcome of the election as a Socialist victory and are bemoaning the fact that the schools of Gloversville are now in charge of a Board of Education controlled by the Socialists and owing its election to the activity of the members of the Socialist party.

ENTER --- "THE ANTI-SOCIALIST" --- EXIT SOCIALISM

We Socialists usually measure the progress we are making by the opposition that develops against us, but we are dumfounded to note that we have reached the point where a special and distinctive journalism is said to be required against our encroachments.

One Barnhill, of Washington, D. C., is the party who has discovered this crying need, and if he can get sufficient plutocratic sup

port, proposes to issue from the capital a monthly organ which will be known as "The Anti-Socialist."

On October 1 this publication will make its initial appearance, its program being "Socialism must be destroyed."

Barnhill, who for several years has eked out a precarious exist-

ice defying Socialists to meet him in public debate, and demolishing I who had the temerity to accept his challenges, is now going to splete the job with his pen. He has a splendid collection of war material in his armory, too-

choice assortment of dead men's bones that would make Bryan turn green with envy. When B. rattles his equipment vigorously as is his wonted way, the sound thereof is most imposing. What Jefferson said, what John Stuart Mill said, what Du Quesnay said, what Herbert Spencer said, what Erskine said, all

ese things are said by Barnhill, and to do him justice, he says them very well indeed. Now the problem that B. has on his hands is to convince suffint plutes that when all these things are said, consecutively,

eriatim and one after the other, Socialism will vanish instanter. And after Socialism has disappeared competition will go on doing iness at the old stand as it has done since the Creator established

it when he constructed this earth. We gladly reproduce here a sample slam from the prospectuc of Barnhill, calculated to begin the job by eliminating Berger from

Hon. V. L. Berger, the Socialist Congressman, condemns competition. It appears to be an irreparable calamity that Mr. Berger was not present at the creation. In that case he would probably have saved the Creator from the mistake of building the world on a competitive plan. Compelled to create the world without the aid of Bergerian m, the Almighty employed the competitive plan, the Socialist plan not being known to the Omniscient Mind till the recent Milwankee victory. "Competition is dead:" something contradicts thee. Dr. Berger: I am afraid it is Nature

Now, Berger, be good enough to consider yourself dead. It was coming to you, anyhow. You were lead into this belief by such miserable knownothings as Rockefeller, Gary, Perkins, Roosevelt and several other nincompoops who testified to that effect at various trust investigations. But you did not reckon on God, and Natureand Barnhill, and now destruction has come upon you.

The fiat has gone forth. The first step in the absolute annihila-

tion of Socialism has been taken. Barnhill cannot be answered. No use to question his accuracy. It's beside the question to ask Omniscient Wisdom did not perceive the Milwaukee victory when was creating the world six thousand years ago. And it would be blasphemy to question the assertion that God did really create the world on the competitive system. Nor can the issue be confused by inquiring whether Berger is up against "God," or "Nature"—or Barnhill, or all three combined, or whether since competition has been eternally decreed, Barnhill should be so infernally flustered about the danger of a miserable worm like Berger destroying it. All hese questions are simply frivolous.

Barnhill wants the cash. Money talks, too. Now, you plutes own with the dust and rally to the support of God and Nature-and,

incidentally, Barnhill. How can you resist his appealing cry?

Now, J. B. B., won't you please put us on your X list for this free ad? We hope you may pull the plutocratic legs good and plenty. In the meantime, we await submissively your avenging stroke. It is fate. When we started this Socialist business we didn't know that you and God and Nature were waiting 'round the corner to slam us. The only boon we crave, therefore, is that you send us your first and if by chance we should still survive follow it up with one and we will give up the ghost with humble resignation to your unalterable decree. Competition is eternal, but we despair of ever being able to compete with YOU, to say nothing of God and Nature.

THE CIRCULATION OF COMMODITIES

Sinister evidence of the slowing up of the capitalist industrial machine is contained in the report of the North Atlantic Steamship Conference, which shows a great increase in the exodus of steerage assengers to Europe during the present year. The number is given as 291,705, an increase of more than 75,000 over the corresponding period for last year, and more than 180,000 greater than the corresponding period for 1909.

The conference declares that this exodus is an indication of

forthcoming business depression. They are possibly correct, but certainly not for the reason that the steerage passengers have figured it out in this way to their own satisfaction, or that knowing in-stinctively that the winter is coming they head homeward like migra-

Their departure is rather a result of present depression and consequent growing unemployment. If these people were really intelligent enough to forecast a coming period of depression, and had worked out the causes therefor, it is doubtful if the exodus would have taken place. They would in such case have known that flight d be useless, that conditions in Europe were no better and would come worse by their going there and increasing the competition for jobs in a market already overcrowded. They would have reached the Socialist conclusion that the thing to do was to stay here and

assist in wresting the control of industry from capitalism.

There is a popular fallacy assiduously cultivated by the capitalist press that these people largely go back to Europe to retire or their savings, an idea that isn't exactly corroborated by the fact that the wast majority of them return as they came—in the cheapest man-

The fact in itself is a significant comment on the outpouring the frothy exponents of the "gospel of cheerfulness," the advotes of "restored confidence" and the lying prophets of a coming

Industry has never completely recovered from the depression of the 7. There has never been a period since then when the entire ustrial equipment of the country was running. What recovery re was has been but partial, the fact being that there was no

Consequently, we are not surprised to see the following from the pen of John McElroy, one of the savery of the Union, and editor of the National Tribune, a paper which goes to some 100,000 gold soldiers throughout the country, and lives by recounting the chartest that the United States will have a new Constitution in ten years. If he does not understand this people and its institutions, it is scarcely for the reason that Mr. Mc-Elroy states, for Berger has hardly any remembrance of his malive land. Possibly the editor of the Tribune would kindly inform the public how long a man must five in this country before he understands its institutions. concomitant increase of the so-called floating population on land—the ramp, the "hobo" and the "blanket stiff." Both are at the beck and ramp, the "hobo" and the "blanket stiff." Both are at the beck and all of the capitalists when needed. The Atlantic is no barrier, but perhaps the easiest path for travel when the capitalist needs cheap labor.

The circulation of inanimate commodities is declining and the market that could possibly absorb the output capable of being produced by the whole of the industrial equipment. And between the competition in the wage labor market and the increased prices of necessities, the workers have been skinned almost to a finish.

This exodus eastward across the Atlantic is really a true part of our "floating population." Its counterpart will be found in a periodical breakdown of capitalist industry.

LETTERS TO THE EDITOR

THE BERGER OLD AGE PENSION

Editor of The Call:

In last Sunday's Call there appeared as elaborate defense of Comrade Berger's indefensible old age pensions bill from the
pen of his secretary, W. J. Ghent. Notwithstanding its length and elaborateness,
however, the article, instead of answering
the critics, really dodges the issue. There
is in it a whole lot of abuse of the
critics, but not one word in answer to the
most important criticism leveled against
the bill—the requirement of citizenship
for sixteen consecutive years before one
can get the benefits of the act.
Comrade Ghent says on this point:
"If a pension act is to be based on the
Socialist principle of returning to the
deserving aged worker some part of the
surplus value which has been taken from
him during his prime; if, furthermore,
the funds for this scheme are to be raised

Barring a little nonsense about the funds being raised "from men who toil to produce wealth" and who at the same to produce wealth" and who at the same time participate in the "expropriation" of surplins value, this sounds reasonable. Only, well, only it is nothing but a dodge. For, what has all this to do with citizen-ship? Remember, it is not residence that we are ralking about, but citizenship. We are all agreed that a certain period of residence should be required. What is a projer period of residence is a matter fair-ty delantable. But remember this is not residence should be required. What is a proper period of residence is a matter fairly debatable. But remember this is not the question under discussion. Nobody ever criticized Comrade Berger for prescribing a residence requirement, for the simple reason that this bill does not prescribe any period of residence, but a period, of citizenship, which is a different matter. What has citizenship got to do with exploitation? Are the millions of non-citizens who toil to produce the wealth of this country exploited less than the citizens? Or are they less "deserving" that "some part of the surplus alwe which has been taken from them during their prime" should be returned to them as office and conducting political activities of nour part of the surplus alwe which has been taken from them during their prime" should be returned to them as office and conducting political in our platform? Students of our industrial history annot fail to be struck with the pro cannot fail to be struck with the pro-found significance of the recent strikes. Superficial thinkers may rest satisfied with tracing them to an epidemic of sheer diabolism. In reality the strikes may be likened to a volcanic cruption, the outcome of convulsive forces which have long been smouldering in silent subtertanean fashion. The insilent subterranean fashion.
