Why You Should not be Defeated at the Polls!

Socialism vs. Capitalism.

The Challenge of the Socialist Labor Party's Nominee for Mayor in Haver-Mass., to his Capitalist Competiers of all Shades.

to Mr. Mellen A. Pingree, Candidate for Mayor of the Demopublican or Republicratic Party, and Mr. John C. Chase. Candidate of the "Democratic Social" or "Social Democratic" com-

Sirs:-As the nominee of the Socialist Labor Party for the office of mayor, I bereby challenge you, individually or wintly, as you may prefer, to appear lefore the voters of Haverhill in public debate with me and show cause, if any rou have, why you should not be left at home on next election day. The city of Haverhill is substantially earlyingmen's city: of the 8,000 yotes

workingmen's city; of the 8,000 votes lich it polis, fully six (6,000) are cast by the working class. At the most the class which you jointly represent— the capitalist class, including the mid-

You, together, are entitled to those 1000, which you may distribute among yourselves as you like, but not one of the other 6,000 can you obtain except by se pretences-i. e., by buncoing the rorking class.

I challenge you, Mr. Pingree, to deny t, if elected, and during your admir stration there should occur a repeti-tion of the great Haverhill strike of 1894 and 1895, and the governor were to order out the militia, or the courts were to be used to break the strike, as was he case, you would remain silent in your chair in the City Hall, or applaud such action, as you did during the strike above referred to, when your prosenter with other members of your proession, furnished the governor of this commonwealth with a testimonial of your congratulations and endorsement of the infamous rulings made against the striking shoe workers in the local

And I challenge you to deny that you had stand to-day where you stood then, when you hastened to approve of meh villainous acts and protect your bliow-conspirators in their antagon-im to the toiling masses, as behooves one who stands on the capitalist plat-

I challenge you, Mr. Chase, to deny that you are a member of and, in this contest, the standard bearer of the Socontest, the standard bearer of the So-dal Democratic combination, the tac-tics of which are so loose or so "broad" that in the city of New York, a short time ago, they combined with the Inde-pendent Labor Party, a party known to be officered and run by Tammany polit-ical heelers in the interest of "Dick" Croker and "Pat" Keenan. You will, therefore, not deny that soon after the consummation of your deal the same independent Labor Party was captured, horse, foot and dragoon, by Tammany Hall; thus does your combination uphold and guard the welfare of the work-ing class in the nerve centre of capital--New York City.

I challenge you, Mr. Pingree, to deny that, since the birth of our American republic, your class has enacted all legislation in town, city, state and na-tional, under which class legislation the let of the working class grows barder and harder, while your class ex-

ploits them all the more.

that you have repeatedly in your public utterances endorsed the middle class municipalization scheme, known as the "Glasgow plan," a scheme which, according to Muldoon's "Municipal Own-ership," forces each councilman in Glasgow to be posesssed of £5,000 (\$25-, (that city of participation in the con-

duct of the city affairs.

I challenge you both to publicly deny that you are both upholders of the capi-

talist system and wage-slavery.

I challenge you both to successfully that the only platform upon which the class-conscious workers can con-sistenly unite is the platform of the Socialist Labor Party, as promulgated and lived up to by means of its shakeunflinching and uncompromising tacties; that it is suicidal on the part of the workingmen to vote for or place their trust in any other political party, political burlesque, or political night-

I challenge you both to show that you ould if you could, or you could if you could do anything that can permanaity benefit the working class, and I e myself to prove that not a thing be of lasting benefit to the exploited age workers. On the contrary, the election of the Socialist Labor Party candidate would mark the beginning of a new era; it would be a shield to the working class, and an entering wedge to the final conquest of the public powers by that class, and the final establishment of that social extern under shment of that social system under thich he who works shall live, and he who can and won't, die; instead of as who can and won't, die; instead of as oday, when the class which you jointly uphold toils not, yet rolls in wealth, blundered from the working class.

"SILENT MURPHY."

A Political Campaign Incident that Foreshadows the Event to Come.

WHEELING, W. Va., Nov. 27 .- A Democratic leaflet that just fell into my hands put me in mind of a recent campaign incident in Elkins, in this State.

White miners had been ground down so far in the Elkins region that there was no more "patching up" to be done. They simply threw down work, and re-fused to return to the mines on "promises" or sweet words, or pretty phrases descriptive of "pending improvement," or any of the other lures with which formerly their discontent had been temporarily allayed. They simply would not budge. They were ready to starve, and let the company bury them. They had come down to "bed rock."

Under such circumstances, the company called off its fakirs and blandish-ment distributors among the men. .The money hitherto spent on these fakirs, to keep them at "work" among the men, was to be used in a different direction. It was to be disbursed in bringing ne groes into the district. After a while the negroes began to turn up; they were speedily broken in; more came; more were broken in, but still the men held firm. When finally a third and fourth batch was dumped upon the district, more numerous than all the preceding ones, the men lost heart, they broke ranks, and have ever since been broken-

The introduction of negroes into the district was an epoch to the people there. The subject never ceased to be spoken of. Tho broken-hearted, the spoken of. The broken-nearted, the sentiment of rage fires up the men and the whole population every time it is mentioned. Now, then, into this disstrict Steve Elkins, the millionaire and U. S. Senator, walked one day during the campaign, and delivered a stump reach in Elkins. A large crowd had speech in Elkins. A large crowd had gathered. Elkins tried flights of rhetoric; the audience remained unmoved toric; the audience remained unmoved; he tried pathos; no applause; he tried the effect of a loud screaming; still no applause. Then he played what he thought was a trump card;—he does not think so now. He knew the importation of negroes episode still stirred the blood of the townspeople. So he tried that He said: tried that. He said:

"The people who are running the Democratic party are the sworn enemies of the working people. Who was it who brought the negroes into this district and—"

Into this district and—"

Before his question was finished, the answer came. In the audience there was a certain miner, who was a character. I don't know for what reason, he went by the name of "Silent Murphy." When Elkins started to touch upon the negro episode, "Silent Murphy" rose majestically, the genius of the crowd, and when Elkins loudly asked the question: "Who was it who brought the netion: "Who was it who brought the ne-groes into this district?" "Silent Mur-phy" hurled the answer swiftly back:

The meeting, of course, broke up im-The meeting, of course, proke up immediately. Elkins dropped into his seat, as if shot, and hurriedly loft the town. "Silent Murphy's" answer was a bull's-eye. Elkins was at the bottom of the deed, and his hypocrisy was punctured in the most effective way resulted.

Now, the Democratic campaign leaflet that reminded me of this Elkins epi-sode contains a number of questions ad-

sode contains a number of questions addressed to the voters. Among the questions is this:

"Who is it that fosters, promotes and protects the Trust"

I have not heard the answer. If only among the crowd of voters in the State there were one "Silent Murphy," with "Silent Murphy's" penetration, quick wit, nerve and daring, then the answer that knocked out the rollitical hypocrites that knocked out the political hypocrite Elkins, would also make the quietus of the capitalist political concern that is-

sued this leaflet.

But a "Silent Murphy" is organizing itself throughout the land, and girding up its loins to hurl political hypocrisy down the throat of our deceivers.

That "Silent Murphy" is the Socialist Labor Party and the Socialist Trade & Labor Alliance.

Socialism knows that revolutionary upheavals and transformations proceed from the bed-rock of material needs. With a full appreciation of, and veneration for, moral impulses that are bal-anced with scientific knowledge, it eschews, looks with suspicion upon, and gives a wide berth to balloon morality. or be it those malarial fevers that re-formers love to dignify with the name of "moral feelings."—From "Reform or Revolution."—See advertisement.

THE PEOPLE'S last issue for this year -Sunday, Dec. 31,—virtually the New Year's issue for 1900, will be of special value. It will contain the "Story of the Bull Pen," giving accurate detailed and startling information upon the late Idaho outrage on Labor,—the secret of who blew up the Concentrator; how it has send that the County Officers, who took the men's side were thrown into the Bull Pen; the horrors of the Bull Pen; the norrors of the Bull Pen; how Gold Republicans, Silver Re-publicans, Gold Democrats, Silver Popo Democrats all united for capitalism; the brutality of the "veterans of the Cuban war"; etc., etc.

The article, apart from its general interestingness, will be a mine of information for the Party's agitators, as it covers the whole gamut of the Social Question, from the high treble of Upper or Plutocratic Capitalism, across all the keys down to the basso profundo of impotent Pure and Simpledom.

Let the orders be sent to the Business Manager promptly, and of fitting size. This special edition should surpass the late May Day edition, which reached and passed 112,600 copies.

SOUTHERNISMS.

Pickings Along the Tracks of Prosperity.

Prices Rising, Wages Tumbling-Artificial Production of Army of Unemployed in Cities by Means of Baited Advertisements, that Lure Labor from the Counties.

RICHMOND, Va., Nov. 24.-The Guano Trust-a subsidiary tentacle of the Standard Oil octopus—has raised prices from \$2 to \$3 per ton on the plea "materials cost more." The middle class capitalist farmer will have to pay this out of his own pocket, as he can neither raise the price of his produce nor lower the wages of his employees; the wages he now pays are so low as barely to induce less able-bodied hands to remain on farms at all-the railways, quarries, etc., offering larger money wages.

Not very long ago these guano men reduced wages from \$1 down to 83 cents per day, and the price of merchandise labor power has not increased. Actually, it has decreased, as the purchasing power of the generous allowance of 83 cents is less, while the exploitation by the masters is now intenser than ever.

The various guano works here, in Georgia and other States are in one trust; and, as aforesaid, are under con-trol of the Standard Oilism-Rocifelder influences. So that whenever the name "Virginia and Carolinas Chemical Co." is used for the sake of its euphonious Southern accent, plantation owners and buyers of its product should remember the cheapness of the "cheap oil" THEY THINK they get is offset by the "hold-up" in freight rates, cost of guano, and the many other "pickings" from them that gravitate to Jay Donation R. via other subsidiary trusts of the S. O. octopus—an important one of which is the American Tobacco Co., which, with the assistance of the Revenue Laws prevents any competition in bidding where tobacco sales take place.

Again, the farmer is assured that the

incoming legislature will place a ten per cent, or more tax on each ton of guano, which piece of news will strike addi-tional terror into the mind of the intelligent farmer, as he is well aware that, to offset this, the guano companies can and will assess him to double that amount, plus above mentioned raise of several dollars a ton, because "ma-terials now cost more"—which is not true, as betterments in machinery and ower wages make a less cost per ton

this year than a few years ago.

The above applies more especially to plantation farmers, who produce for sale and who, unlike the Western farmer, MUST buy guano. The great majority of those who "farm" in this and other States, grow for use or straight barter in exchange, and very many of them work for wages for the larger farmers and truckers and other employing classes. These latter will find it to their interest to ask The PROPLE for a sample copy of the leaflet "The Modern Tragedy," which will post them as to conditions in country dis-

tricts—facts now withheld from them by the entire press. The "Young Men's Business Association" is another curiosity. Under this nom de plume the Chamber of Com-merce (consolidated now) is most gen-erally known. This is the body that is drumming the State of Virginia through the press and circulars, urging female laborers and whole families to here, and, in consequence, the cities of Richmond and Manchester and adjoining towns are already flooded with more seekers than there are jobs at even existing wages. The Association now is mentioned in the papers as the "Busi-ness Men's Association." For some rea-son the "Young" prefix is dropped.

The people of the State are directly interested in this influx of child, female and other cheap labor from the counties. At every establishment here, machine shops included, men are standing around, vainly asking for work. At the Whitlock Branch of the American To-bacco Co. (cheroots), the girls rarely make over \$3 a week, are discharged for the slightest fault and the tobs is often so bad that their wages fall be-low \$3. The whole scheme is to get a surplus supply here of cheap labor, so that with the help of the cheroot and other cigar machines already arriving any strike would be suicidal.

Whatever articles, appearing in any Richmond paper, that seem to take labor's side of this female labor question, are written in such a wishy-washy fear-of-trust manner as to be more apt to concuse than to enlighten the people. The fact of scores of folks arriving here daily from the counties, seeking work at starvation rates and unpleasant environments, is proof that conditions at the places of departure are growing steadily worse

As "the individual inherits from the mass," it would seem that coming generations will rue this day of private ownership of the means of production and distribution, and wonder why the people submitted a moment to such a system and its impudent plutocratic

One Campaign Over, An Other is Forthwith Entered.

Review of the State Campaign-Ten Per Cent Increase-Municipal Caucus, Convention and Nominations-Party Platform, National Officers and S. T. and L. A. Endorsed.

EVERETT, Mass., Nov. 26 .- As is well known in this part of Massachusetts, Section Everett is not numerically strong, but it contains as many thoroughly active Socialists as any Section of its size in the State. Of politicians there are none. Yet the members held successful caucuses in four of the six wards of the city, previous to the State election, nominating delegates to the State, county and Senatorial conventions, and a ward and city committee for 1900.

Our Organizer, Alfred E. Jones, was honored by election to the State Committee, and the nomination of Sheriff of Middlesex County, while Comrade Joel Miller received the nomination for Senator, and Comrades Edwin S. Mayo and Amos P. Jones were nominated for represenattives to the General Court. All of these candidates ran ahead of the ticket, the vote of which, according to official returns, was increased ten per cent.

Again we come before the voters of Everett, having held caucuses in every ward of the city, nominating candidates for the Common Council in most of them, and delegates to a municipal convention in all.

The municipal convention was held at headquarters, 154 School street, on Thursday evening, the 23d inst. The meeting was called to order by the chairman of the ward and city committee, E. S. Mayo, who was made temporary chairman; A. M. Grant was elected temporary secretary.

The committee on credentials reported that there were ten delegates en-titled to seats in the convention, eight of whom were present.

The temporary organization was made permanent. J. E. Finnegan nom-inated Alfred E. Jones for Mayor and he was unanimously elected as candidate for that office.

Aldermanic nominations were called for, and E. S. Mayo, Dougald White and Otto H. Lange were elected as can-

It was moved and carried "that no action be taken on nominations for school committee."

A committee on platform and resolutions, consisting of A. P. Jones, A. M. Grant and E. S. Mayo, presented their report, which was accepted as read.

A committee was appointed to notify Comrade Alfred E. Jones of his nomination, and a recess declared to allow said committee to perform its duty.

Upon re-convening, it was reported that said committee had failed to discover the candidate.

On motion, it was voted that the convention endorse the National and State platforms, the S. T. & L. A., and the Party organ, The People, published at 61 Beekman street, New York.

It was then moved that the convention adjourn, and at 9.45 p. m., the So-cialists of Everett in convention assem-bled, had completed the second chapter of their history of municipal elections in Everett. Now comes the agitation work, and unless all signs fail or our strength gives out, you, the Comrades will hear that Section Everett is one of the strongest in the State, in the

ALBERT M. GRANT.

The Tobin-Eaton organization of shoemakers is breaking up completely due to the overdose of "pure and simple" tactics administered to it by the too-greedy-and-in-a-hurry-for-dues Eaton-Tobin combine.

A member of the Brocton, Mass. Joint Shoe Council declares that the result of the present condition among the shoe workers means a wholesale split between the stamp factory employees and the employees of all other factories in the city, who now belong to union or-ganizations. He adds that independent unions will be formed in every branch of the trade, and those union men em-ployed in the stamp factories will be the only ones who would be affiliated with the general organization. He believes it means to the latter a distinct loss in revenue from the city, and in moral respect not only there, but throughout the craft all over the coun-try. He claims that with but one-third the former membership in Brockton affiliated with the general organization, and the numbers of unions which had withdrawn from the body already in other centers, will certainly cause the destruction of the national body within the next two years because of insufficient dues-paying membership.

There goes another "union builder."

FAKIRS PITCH-FORKED.

Striking Illustrations of the Treason of Pure and Simpledon.

PITTSBURG, Pa., Nov. 27.—During the campaign just over observers were treated to the edifying spectacle of Messrs, Garland, Powderly and Ratchford stumping among the miners of Ohio at the order and in the interests of Mark Hanna. They told the miners in Ohio what a generous and liberal coal operator Hanna was, etc., etc.

"Tragic Pages," that thrilling pamphlet of Comrade Thos. A. Hickey on the experiences made by the miners, tells the tale of Hanna's "liberality." They enable one to judge of the black-hearted duplicity of this trio of obscene buzzards, who, posing as "labor leaders," dare to go to the miners of Ohio and advise them to support Mark Hanna and vote the Republican ticket.

These stool pigeons of capitalism, while bawling "no politics in the union," never cease to trade upon and sell their organizations to capitalism through contributions. through capitalistic parties until they receive their Judas reward in the shape of a political job. Even then the labor movement does not get rid of them; for business in order to retain their jobs.

A few weeks ago Garland and Schaffer, who succeeded Garland as president of the Amalgamated Association of Iron and Steel Workers, went before the Phillips labor commission (i. e. the Labor Fakirs Pension Bureau), and testified that the trusts had raised wages, and that they favored the trust. These paltry rogues told a half truth, which is some times more deceiving than a lie outright. What they DID NOT TELL was that, while wages in some lines have advanced a trifle, yet these same trusts have displaced lots of workers, have also so advanced the cessaries of life that the paltry raise of wages has been swallowed up a half dozen times over, leaving the worker as usual worse off than before.

Schaffer is an ex-preacher; I don't know whether he learned to lie in the pulpit or out of it. But I have his love-ly history at command and will attend to his case later on. Schaffer is a tin plate worker, and the tin industry is his pet hobby. As everybody knows, the tin industry has had tariffs piled on galore. This year the tin plate workers received a slight raise in wages. But received a slight raise in wages. But what the limber-lipped preacher DID NOT teil the commission was the fact that the Tin Plate Trust, controlling 380 tin mills has shut down one-third of them permanently, and the idle tin plate workers are losing almost \$400,000 per month in wages. What harlots are not these fakirs! are not these fakirs!

The window glass workers are to a man high tariff Republicans. Their association was at one time the strongest labor union in existence, having est labor union in existence, having money in their treasury running into the hundreds of thousands. The manu-facturers, however, had an equally compact organization on their side.

From time immemorial the "fire" was supposed to last ten months; from September 1st to June last. But for years the manufacturers have every summer kept the workers on tenter hooks, and narrowed the "fire" down to 7-6-5 months. Always there was a set of petty little quibbles in stock to keep petty little quibbles in stock to keep the worker idle. This year the same thing occurred. The manufacturers baffled the workers for three or four months. Finally they came to a settle-ment that carried with it a slight "raise in wages." Then the workers supposed that the fires would be lighted and all so to work as usual During and all go to work as usual. During this time the workers' association fought the Window Glass Trust in the courts of Indiana, and temporarily, at But now, although the glass industry is "protected" by an enormous tariff, and wages have been "raised," yet the "cinderhead" is not a happy man. Why? Because the manufac-turers will not light the fires until they get good and ready. Verily great is the Republican party and high tariff. Meanwhile the glass worker is "fighting capital with capital" by sitting around, wearing out his trousers and cursing everything in sight except his own cross stupidity. I suppose that in about 40,000 years from now these in-dividuals will learn that the control of land and the tools of production means something.

Four the last few years the four trades

in the Glass Workers' Association, under the leadership of such birds of the red neck variety as Burns and Lake, have fallen out. They have indulged in infallen out. They have indulged in ternal squabbles and cat-fights; branch after another has split off; the hundreds of thousands of dollars have run down to \$36,000; until now the con cern has failen into the hands of President Burns and the executive board with full power to do with as they like With this money, of course, Burns, Lake, et al. will keep the pot boiling for a few years longer.

All this confusion and disunionism

in a once compact and powerful organization has been brought about by "pure and simpledom," i. e., fakerism. The runners of "pure and simple" unions being bent on looting, bringing their organizations to a condition where they are bound to be at the mercy of the manufacturers. That is the present condi-tion of the Glass Workers' Association and is rapidly becoming the condition of all other pure and simple trade unions.

Has the fakir a mission in capital-Has the fakir a mission is impledom ism? Is not pure and simpledom treason to the working class? More H. A. GOFF.

The First S.L.P. Municipal Convention Under Election Laws.

A Full Ticket.

The Only Delegates Absent Were Men Having to Work at the Night Shift in the Mill-Labor's Candidate for Mayor, Frank L. Buck-Aldermanic Vote.

HOLYOKE, Mass., Nov. 26.-Strictly in accordance with the election laws of Massachusetts, the Socialist Labor Party of Holyoke held its caucuses on November 13, 1899, and on November the 20th held its municipal convention at its headquarters, 145 Maple street, and proceeded to place in nomination a complete list of nominees for the city election which takes place on Tuesday, December 12, 1899.

It was gratifying to note that every ward of the city had its full quota of delegates, of whom all were present, except four whose turn it was to work on the night shift of the mills.

The convention at once settled right down to business and transacted the same with despatch and in a most harmonious manner. Reporters were present from the three local daily papers and two Springfield papers. They gave very fair and correct reports of our first municipal convention as a recognized political party.

Frank L. Buck, the Socialist Labor Party's candidate for mayor, is a paint-er by trade, and has been active in labor organizations for many years. He was elected to the Massachusetts State Legislature as a Democrat in 1892. At present he is a member of the Holyoke fire commissioners, having been ap-pointed for a term of three years by a former Democratic mayor of this city. Comrade Buck has been a member of the party for a year, and been identified with our movement for several years past. He is quite an able speaker and has helped us in our street meetings all summer. Nearly all of the other candidates have been members of our party for a number of years.

The Municipal Platform, adopted by the Convention, has this preamble:

"The Socialist Labor Party of Holyoke, in convention assembled, con-forming to the demands of the national organization and harmonizing with the economic emancipation movement of economic emancipation movement of the world, whereby finally, through political and legal means, the present state of planless production, industrial warfare and social disorder is to be substituted by the Co-operative Com-monwealth, and all means of produc-tion and distribution shall be owned collectively and operated scientifically by the people, presents the following declarations for the municipal campaign of 1899, and pledges its candidates, if elected, to do their utmost for their adoption.'

Our chances for polling a large vote are very good. Last year we polled for mayor 279 votes. The old party papers are already warning their readers not to throw their votes away on the So-cialists, as they have no chance of election. Efforts are also made by the old parties to get rid of the "Socialist at-tachment" to the city government, as Comrade Ruther, who has been renomi-nated, is styled. The vote in Ward 3 last year was as follows:

Prec. A. Prec. B. Total. Ruther, Soc. . . . 158 231 Chapin, Rep. . . 238 56 Bradshaw, Dem 92 54 Ruther's plurality over Chapin, 95.

What Comrade Ruther has done in the Holycke Board of Aldermen.

He has attended every meeting of the board. He has defeated the scheme to sell the Holyoke & Westfield Railroad. which is a valuable property and now controlled by the city of Holyoke. He has been instrumental in organizing a printers' union, with every Holyoke printer a member. He has secured a public bath house which has been a source of pleasure to hundreds of men boys and girls; over 100 boys learned to swim and not a single boy has been drowned this year in the canal, when every year at least a dozen boys lost their lives in the canal. He has secured a public skating rink for South Hol-

He has secured the reopening of an old road which had almost been forgot-ten, this being a valuable public improvement.

He has attended to many needed improvements and investigated every complaint in every part of his ward; there is no ward in the city in better condition than Ward 3. He has no condition than Ward 3. He has no doubt been a thorn in the side of many a city official, all of whom have been fearing that the Socialist alderman should catch them. He has had an invigorating influence in the board of aldermen, whose sessions would otherwise have been dull as in previous years, when the sessions often lasted to longer than ten minutes white no longer than ten minutes, while now nearly an hour is consumed. His pres-ence has also had the effect of giving the board a quorum at every meeting, while in previous years it was nothing unusual to have no quorum—the Socialist had to be watched, you know.

Indignation is a fine war-horse, but the war-horse must be ridden by a man: It must be ridden by rationality, skill, courage, armed with the right weapons, and taking GEORGE ELIOT. definite aim.

NO STANDING-ROOM FOR THE FREAK.

Among the hill-tops that the Socialist Labor Party captured and camped on, a solid body, on the night of last November 7, as one of the positions along the logical line of battle in this country, is that which affords no standing room for the FREAK.

What is a Freak?

At first blush, the question seems a Excentricity, mistaken by many for "individuality," being the external trappings of freakdom, the external manifestations of freakishness are so numerous that they would seem to baffle all attempt at reducing the Freaks to one common fundamental principle. Yet not so. Despite all external multiplicity of appearance, there is an essential oneness in Freaks. What that essential oneness consists in, the late struggle within our Party afforded an opportunity to detect, and great is the debt of the movement in America to Col. Abe Gruber-the political lawyer whom the corrupt-reactionary "Volkszeitung" picked out in its attempt to capture the Party's name and emblemfor the valuable aid he rendered in ascertaining the secret of the active or fundamental principle in the Freak.

In the contest before the Secretary of State in Albany, in the subsequent contest before the Police Commissioners, and particularly so in the third and last contest before the Supreme Court, Col. Gruber insisted with increasing emphasis upon one point in his argument; it was this:

"If there is ONE principle in Socialism more important than all others; if there is ONE principle that Socialists hold to firmer than to any other—it is the principle that the Party's officers shall be held by throat, and that, whenever ANY ONE WANTS IT, these officers (violently snapping his fingers and his eyes, and almost jumping off the floor) SHALL BE THROWN OUT:"

Col. Gruber is an able lawyer. He knows that, next to knowing the law, the successful lawyer must be thoroughly saturated with the ideas of his client. He did sol saturate and allow himself to be saturated. The element-touched upon at this place in last week's issuethat rose in rebellion against the Party, seeking to keep it back on the tracks of reaction; in other words, the element whose material sub-class interests struck the keynote of, and furnished the fundamental principle on which the impotent rebellion planted itself;-that element was tongue-tied. Unable to speak the language of the country, it could not, nor did it try the work of "saturating" Colonel Gruber. The work of saturating the Colonel fell to the FREAKS. From them, through the medium of the "international English" at their command, he gathered his ideas of "Socialism," and of the "pivotal point" upon which their "Socialism" turns, to wit: License.

And this-LICENSE-is the essence of Freakdom, as is well indicated by the notion that a sober, serious organization of men, like the Socialist Labor Party, can have for its pivotal point the reckless, indecent principle of yanking its officers in and out, for the fun of it, and promptly obedient to the whim of any

Whether the Freak manifests himself in the garb of a squaw-swapping Free Lover, or in the motley of a Free Knowledgist, or in the paint of a Free Individualist, etc., etc., LICENSE is his active principle. A decent regard for the opinions of others; a decent regard for inherited decency and experience of the race; a decent regard and due appreciation of the meaning of the word "democracy"; in short, a manly submission to the bands of restraint, self-imposed by civilized man; -all this is absent from the Freak. LICENSE is the active principle to his feelings, his thoughts and his actions.

The Freak is an element of disinte-

gration. A physical, mental, or moral cripple himself, the microbe of LICENSE fastens upon him as upon luxurious ground, and blossoms forth into those manifold exhalations of "Freedom" or "Individuality," that are poison to whatever body inhales them

It is a feature of Social Revolutions that they start with the sensitive element in the body social; it is the fate of Revolutionary Movements that they attract the Freak, like light-houses attract crows by night; it is a weakness of Revolutionary Movements to often mistake the hysterics of the cripple Freak for the intensity of their own sensitive element.

In other countries, abroad, matters might possibly justify a different course; here in America, however, not until the Revolutionary Movement has become strong enough to present so unyielding a front that the Freak dashes himself to pieces against it, like crows against light-houses, not until then has the Revolutionary Movement grown out of its swaddling clothes, reached virility, and taken the requisite stand.

Upon that ground the socialist LAROR PARTY camped triumphant on last election night. On that campingground there is NO STANDING ROOM FOR THE FREAK.

The Daily People in Sight!

On the third page of this issue will be found the report of the conference, held last Sunday, by Socialists and their friends in New York and vicinity, upon the matter of the DAILY PEOPLE.

Carry the gladsome tidings to the remotest corners of the land.

POLITICAL and ECONOMIC.

Holyke, Mass., capitalist papers are evidently nervous. The Socialist Labor Party's municipal ticket is keeping them on the hop. In flaming headlines, the evening "Globe-Democrat" an-

Socialists Have no Chance of Success. And further below it declares:

There is as much chance for Buck, the So-cialist Labor Party's candidate for Mayor, to be elected, as there is of electing Dr. Mary Walker President of the United States.

The "Globe-Democrat" is making a great mistake. In its nervousness to stay the growth of the Socialist Labor Party, it is adopting tactics that rather tend to defeat its own purpose. Holyoke workingmen are no fools. When they see such long articles and scarelines intended to convey the impression that the S. L. P. nominees are farcical, they are apt to scratch the backs of their ears, and ask themselves the question:

"If the thing is such a farce, why do these capitalist papers spend so much time upon it?" Whereupon the self-evident, illuminating answer is bound to flash through the questioners' heads:

"Since they DO spend so much time upon it, the thing CAN'T be a farce!"

It is a dangerous thing for the capitalist class to set the workingman's thinking aparatus a-going. Once started, by such self-contradictory articles as those that he "Globe-Democrat" perpetrates; once questions like the above are incited, producing such correct conclusions and answers as just given :once led in that direction, some other and still more luminous conclusions inevitably begin to leom up before the thinking workingmen. Among them, the following conclusion is one:

"Better far to vote for what you want, and not get it, than to vote for what you don't want, and get it—in neck!"

The Cleveland, O. "Citizen" is so thoroughly soaked in the habits of fakirism and of "pure and simple" bluff, brag bombast and braggadocio, that it forgets that such tactics don't work outside of "pure and simpledom,"-least of all in the domain of politics. Sore all over at the walloping it has just received a the hands of the Socialist Labor Party in the Ohio elections, it now says:

Section Cleveland and its branches have a total membership of 125 (!), and if some sort of union or federation is decided upon in the near future the Socialist (!) movement in this city will be in about the same position that it was before August 30, when 49 (!) "Kickapoos" seceded and "re-organized" a section. SEVERAL NEW BRANCHES ARE IN SIGHT, AND DESPITE ALL OBSTACLES THERE WILL BE A STRONG SOCIALIST MOVEMENT IN CLEVELAND BEFORE SPRING (!).

All of which would be silly enough if, instead of politics, "pure and simple" unionism were the subject. On that subject and domain, heedless gabble, bluff and bluster are pretty safe. They are never "called down." Not so on the subject and domain of politics. On a certain day in the year, the NATION calls: "TIME" And then every political organization has to toe the chalk-mark. What chance has Bluff or Bluster, Heedless Gab or Bombast under such imperious circumstances? None whatever Only FACTS can survive that national call of "Time!"; FICTION is dispelled like so much chaff.

And herein lies one of the lovely features of our American political atmosphere. The annually recurring call of 'Time!" works like a veritable political disinfectant. In the feverish political life of America, Humbug is consumed like straws in a burning furnace

There is nothing worse than bad habits; nor is there a worse school for acquiring such habits than the school of pure and simpledom."

The Socialist Labor Party in Wyan-dote County, Kans., having polled this year 237 votes—5 per cent. of the total poll—rises to the rank of an officially recognized party.

LAWRENCE GRONLUND.

An Object Lesson to Members of the 8. L. P.

By Dr. H. S. ALEY, Lincoln, Nebr.

Throughout the length and breadth of the domain of capitalism can be found millions of the middle class, and hundreds of millions of the proletarian class still supporting by their votes the capitalist regime, who are dissatisfied with existing economic and social conditions. At the same time thousands of this same middle class and millions of these proletarians have reached that state, intellectually, where they fully realize the ultimate downfall of the present system, also that, if social progress is to be the order of the future, Social-ism must take the place of capitalism. Many of these latter—seeing destitu-tion, misery and insecurity for the many, in the midst of an overdowing plenty, and also seeing that the tendency under capitalism is for this desti-tution, misery and insecurity to increase, not diminish-instinctively come to condemn an economic system that is accompanied by such dire results. These individuals, as a rule, being ideo-logists—and as even the enemies of So-cialism admit it to be a beautiful ideal -candidly admit that collective owner-ship of all the means of production and distribution is the only way out of the

present Egyptian land of bondage into the future promised land of Canaan. Perhaps not one in ten thousand of these idealogists can give a logical rea-son why Socialism MUST take the place of capitalism in the natural process of Social Evolution. The large majority of these would doubtless give a purely ethical reason for the faith that is in them, while perhaps ninety per cent. of those who can give a sound economic reason for the necessity of Socialism, would object most strenuously to the teachings of the Class Struggle, based upon Marx's materialistic conception of history. To this latter group belonged the late Lawrence Gronlund, author of "The Co-operative Commonwealth, "Ca Ira," "Our Destiny," "The New Economy" and other sociological works.

I think all scientific Socialists will accept Gronlund's economical teaching in "Co-operative Commonwealth," his interpretation of the causes that led to the French Revolution, as set forth in "Ca Ira," but not his attempt, in this same work, to make Danton, instead of Marat, the champion of the French proletariat. Danton stood, from start to finish, as the exponent of the bourgeois or third estate, not the pro-letariat or fourth estate. While Gronlund in "Ca Ira" recognized four distinct classes in France in 1789, viz., the first, second, third and fourth estates; while he also recognized that the revolution liberated only the third estate, and that the emancipation of the fourth estate was to be the work of the future, somehow he failed to comprehend that the emancipation of THIS class, the fourth estate, must be the work of THIS class, and that, in its emancipation, it will of necessity be compelled to antagonize the economic interests of all other classes, and for that reason will be fought by all other classes. In his failure to understand this he was unable to see the pivotal point around which everything circles

in the present revolutionary struggle.

Taking Danton as his ideal of a revolutionary hero he devoted his life in an appeal to the middle class to save conscious by recognizing the class to save conscious by recognizing the class struggle, Gronlund never worked harmoniously with our movement.

As one who was quite well acquainted with him I have never questioned his motives, but, on the contrary, believe him to have been honest in the position he assumed toward this question. No one could talk with the man for ten minutes without being impressed with his earnestness. His whole mind and energy were absorbed in Socialist ideals. In fact, the better part of his life was giving to teaching these ideals, and trying to induce others to engage in the same work. From our standpoint he on the materialistic tion of history, but strong on sentiment In fact, his motto was when here "Sentiment rules the world." While that of the S. L. P. and the Social-Democracy throughout the world is that, in the last analysis, material interests determine man's action individually and collectively, hence the course of history. All Socialists who have read the first two books above mentioned will appreciate the value of the work done by him for Socialism, especially his demonstration of the exploitation of the working class in the "Co-operative Commonwealth," and the analysis of the true cause of the revolution of 1789 in "Ca Ira." In consideration of the value of these two works. I feel that the S. L. P. can now well afford to cover with the mantle of charity the mistakes made by him in other respects.

An Ideologie Plan.

During the compilation of the last census, Gronlund held a position in the census department at Washington, and while there conceived the plan he at-tempted to carry out in the West during the two or three years following 1892 and 1893. His plan, as given to me, when lecturing here in 1893, was as fol-lows: Starting out with the idea that not material interests but, on the contrary, "sentiment rules the world," mapped out this program, viz.: would visit the cities and towns of the United States, especially the educa-tional centers, and jecture to the middle class students who fill our colleges and universities on the aims and objects of Socialism. In these jectures—after making these aims and objects clear he would appeal to the moral sentiment of these students as citizens of this country to do all in their power to usher in this grand and glorious economic change. Then, should he succeed mic change. Then, should he succeed in converting any to Socialist ideas, he proposed to ascertain how many of these youths were, as he termed it "truly generous." A truly generous person he defined as "one willing to sacrifice his own individual interests for the social good." Out of this number he proposed to induce as many as possible to join together into a circle or club for Socialist propaganda, also for the purpose of mutual education along So-

cialist lines. He had been lecturing for some time when he arrived here, and so far he had not made a single convert. Six months later, in a communication to the "Twentieth Century" from Salt Lake City, Utah, he complained that "the truly generous American youth" was a rare bird, as, so far, he had not succeeded in bagging one. He admitted also his failure had been predicted, be-fore he left Washington, by a Swiss professor who for many years had under his tutelage many young Americans, not one of whom came up to Gronlund's ideal of a "truly generous

Gronlund reached Lincoln from Kansas State University in the winter of 1892-93, and was invited by Chancellor

Canfield to lecture before the Political Economy Club of the State University. My impression is that this club had been but recently organized, and that he was the first to lecture before this organiza-The Chancellor introduced him to an audience of several hundred stu-dents and citizens, paid a glowing trib-

ute to his ability as a writer on social and economic questions, but failed to mention the fact that the lecturer's chief means of support was the com-mission he derived from the sale of his books, his royalty for same, paper bound, being only one cent per copy. Through the Chancellor's influence, he was also invited to Fremont, Neb., a distance of about 55 miles, fare \$3.30. As recompense for lecturing before the middle class students of that town, he as permitted to pay his own railroad fare and hotel bill. At least, so he informed me on his return to Lincoln. While in this city he delivered three or four more lectures at the Universalist Church to distinctly middle class audiences, and at none of these was any attempt made to aid him financially, even to the extent of helping to sell his

At that time there was no S. L. P. organization in Lincoln, the nearest approach to it being a Nationalist Club, composed principally of working people, nearly all of whom voted the Populist ticket. During his stay at this place he made my office his headquarters, especially during the day time, and, as a result, I had many long talks with him, and came to know him quite intimately. Through these conversations, I learned he took no stock in the Nationalist movement; objected to the drift of Bel-lamy's "Looking Backwards," on account, as he said, of the military character of the organization therein set forth; hence he took little interest in our Nationalist Club, although he did, on my invitation, attend one of our Sunday afternoon meetings, and took part in the general discussion. In spite of his antipathy to Nationalism, the members of the club purchased and helped sell several copies of his books, and would doubtless have done much more had he shown any disposition to meet and dis-cuss social problems with the working class. He seemed to have no confidence in THIS class, especially in its attempts to educate and emancipate itself. The establishment of a condition that would insure economic equality to all, could and would come easier, according to his ideas, by and through the altruistic sentiments of the middle class. His is not the only brilliant intellect that has muddled on this point, as have at the present time many shining examples of such.

When ready to leave for Denver, the Chancellor secured him transportation over the B. & M. to that point, but had it not been for the Nationalists he would have been compelled to fast between here and there, as he did not have cent with which to pay for his was ready to start, he informed me of his financial condition, and money was raised to help him out of the dilemma he had been left in by the middle class of his city. His lecture before the Political Econ-

omy Club of the Nebraska State University seems not to have been appreciated either, as in a list of the speakers-who had addressed the club since its organ-ization, and which was published last spring in the State Journal of this city— I failed to find his name.

The Polar Star of the Class Struggle.

For the past three or four years I have known but little of his movements other than from occasional contibutions to Debs' Social Democrat and the bourgeois press. To the last, as near as I can learn, he opposed the position of the S. L. P. on the class struggle; and to the last hoped to usher in socialism by appealing to the sentiment of the middle class. His failure along these lines to accomplish any definite results for the cause he was so devoted to should stand as an object lesson movement for years, who still cling to the idea that the middle class lion and the proletarian lamb can be made to recline peacefully side by side, on the same grassy mound. All new recruits to the S. L. P. should learn from the lesson that Gronlund's life teaches that, while sentiment is all right in its place, the time has not yet arrived in the history of the Socialist movement of the United States to push it to the front. They should be made to see that, while sentiment MAY be made the trump in storming the fortress of vested rights and privileges, it is of little use when we are about to conduct a prolonged siege. In our war on capitalism, we are now, and will be for some time to come, in the slege stage of the campaign; in other words, we are now constructing the intellectual bases of our movement, and in it sentiment has no part. In proportion as this basis is laid broad and deep, in that proportion will capi-talism give way peaceably and without friction to the Socialist Commonwealth. Science must be the guiding star of the constructive Socialist to-day. In the educational work we have in hand, it should be no more necessary to appeal to the emotions than it is for the profes-sor in biology, chemistry or astronomy, in order to successfully teach these sciences. Were it possible for the sen-timental Socialists to win at the ballot box to-morow, Anarchy would reign supreme the day after.

Wise Internal and External Tactics of the S. L. P.

Socialist philosophy is no longer in the theological or metaphysical stage of its existence. Through Marx's and Engels' discoveries, it reached the positive stage, hence has become in the true sense a science. In order to understand this philosophy in all its fullness one this philosophy in all its fullness, one must be either a proletaire or view it as a scientist through the spectacles of

the proletarian class. The middle class, being barred from the first position, rethe second. Each insists on holding his little store, his little factory, machine shop or foundry, or his little 80 or 160 acre farm between himself and the promised land of Socialism. This accounts for the confusion among those of this class who have come into our movement from altruistic motives. As a rule, these recruits sooner or later drop out one by one, thoroughly disgusted with what they call the "intolerance" of the S. L. P., and henceforth each of the S. E. F., and henceford each of these backsliders may be found damning the ignorance of the masses and telling of the "sacrifices he made for Socialism," and how little these sacrices were appreciated by the members

of the S. L. P.

Had these muddled individuals, as well as Gronlund, studied social and economic problems more from the ma-terialistic standpoint, through the spectacles of the proletarian class, then, when they came into the movement, they would have come to aid in em-phasizing the truth of the class struggle. not to find fault with the organization's refusal to sugar-coat our demands so as to make them more palatable to the members of the middle class.

In conclusion, let me say, every day is emphasizing—to all who are in touch with our movement—the wisdom of the tactics of the S. L. P. in regard to all alliances, or even exchange of sympathy with the rapidly dying middle class. Let our watchword continue to be: "WQRKour watchword continue to be: INGMEN OF ALL COUNTRIES

A CRACK AT THE REFORMER.

If life ever wearies the Socialist, it is when he comes up against the Reformer. The Populists, the Debyites, the Bryanites, and the Single Taxers claim to be losing sleep over their desire to REFORM society, and when the Socialist avers that he would not turn over his hand for all the reforms that their versatile imaginations have ever conceived, the Reformer claims he cannot understand our logic. U. S .- Why so?

B. J.—In the first place, there's such thing as a "capitalist class" and don't know of any such difference "capitalist class" and "working class"

U. S.—You don't?!

B. J.—I don't. Where does your "a italist class" end and your "work class" begin? The distinction is pureling ginary. imaginary.

U. S. (beginning to quiver like a that scents a mouse)—Ha! "Where to one ends and the other begins?" B. J.—Exactly.
U. S.—And the distinction between two is "imaginary?"

B. J.—Yes.
U. S.—I think I know what you mount i'd like to be sure. Would you mutting it clearer? B. J.- Tis clear enough as I put 1

But I'll make it still clearer. One as has 100 millions; guess you'll call his a capitalist; another has 50 million guess you'll call him too a capitalle third has 1 million, ain't he a capital Yet another has \$160,000, is he a cap A fifth has \$10,000; a sixth he \$100; a seventh has 50 cents. \$100; a seventh has 50 cents. Whe are you going to draw the line? Oday I hear how a capitalist of \$1000 day I hear how a capitalist of \$100 "smoked out" a lot of middle class ple, and another day I hear of a talist having gulped up the proper of a millionaire. Unless you can dra the line sharp between capitalists non-capitalists your distinction is

Have you ever considered the affinity fresk has for freak? Have you ever thought of the way crook seeks crook? These characteristics may be innate, or they may be the manifestations of an exterior propulsive force. Whether or not this means anything is of no consequence. It is only intended to prepare the reader's mind for what is to follow. he reader's mind for what is to follow.

In the city of Boston, famed for its blue sockings and its blue noses, there exists a certain, or uncertain Social and Bonomic Club, better known as the Care of the Winds, and having as many cher aliases as most of its members. The zephyrs which blow are of diverse inds; the freak who exists for freakishness; the crook who exists for crooked-ness; the discarded and broken ex-memer of the S. L. A general debating club is, at best, a doubtful proposition. We find that those who have not intelligence enough to stick to a problem until they even partially understand it, will, at any time, in "general debate," tackle any time, in "general devices," and a great many above it. They like to quibble. They take great delight in "not seeing your point, sir," It is meat and drink for them to contradict and to be centradicted. They discover that single tax is the complement of socialism—or something else which it isn't. One finds that it is an example of synthetic division, and that, whatever is repugnant to reason must therefore be right. They to reason must therefore be right. They spend many hours discussing the question as to whether a certain man is a determinist, a pure determinist, a mild or a rabid libertarian, and the only thing that keeps them from finding out is the fact that no one person present knows what he is talking about. Some wish to make Socialism better, and, if the freak is a woman, her one idea is to put a ribbon around its neck. They have some few tags of phrase book Latin, such as that with phrase book Latin, such as that with which the Kangaroo winged us during the first few issues. They quarrel, split hairs, "draw distinction," dispute and blackguard in order to make the meetings "interesting." Thus it goes with an endless turmoil of blatherskitish talk and nonsense. These free and easy discussions usually simmer down to an open attempt to side-track the S. L. P. Their apparent freedom and by D. P. Helf apparent recommendation in order is only a revamped middle class radicalism. A go as you please to party may lead to something decided, but one never has as yet. We find that every society when organized is carefully examined by some broken leave is tallectual skyle who looks over fown intellectual skate, who looks over the field and considers whether there is any hope of additional income in it. The present state of society in America, and especially in such cities as Boston, cannot but give rise to mountebanks of all sorts. Some are half educated. Others have only a copious flow of ra-ther questionable ideas, and with them they seek to impose upon the working class. Doctors without patients, lawyers without clients, clergymen without calls, the refuse of our schools and colleges, the scum of the newspaper world may all be victims of our unjust and horrible system, but the working class, through their own party, the S. L. P., protests in turn against being the victims of such men. The labor fakir, the "respectable revolutionist." the parthe respectable revolutionist, the par-asite out of a job find here their level and seek to sponge on those with whom they come in contact. They are ser-vile; they are fawning; they have all the earmarks of an impostor, and when they are dragged to light they swagger

with all the braggadocio of a Bobadil. At the last meeting of the club, the question under discussion was, "Does the physical objectivity of the dazzling money-form militate against its accept ed development?" All the talkers took the same side, so that they would be sure of enough opponents, and in one of these societies the surest way to get up a fight with a man is to agree with hm. The president of the club was the first speaker. He would be the only peaker, if he had his way. He began with an invocation to De Leon, and in the excess of his love every time he pronounced the word he tried to bite it. regardless of the fact that it would have been sure death to the word. Then he wandered off to the Dreyfus affair, and he talked on that until he remembered that he was not abusing the S. L. P. Then he gave another example of Deleonophobia. In Massachusetts a man cannot get on the voting list merely through his ability to spout nonsense. Thus, the president belongs to a class of men, limited to no one nationlity. Such a person as Isaac Borovs-ty-a wholesale peddler and saloon-tseper,—or Congressman Fitzgerald— described by himself as: "Me, little Jack Pits; all youse fellows knows me; me, who ust to run about de Nort End wid me shirt tail out"—alone can keep the "idealists" in line and get them on the list. When they have no votes, they spend their time telling other people how to vote. spend their time telling other people how to vote. When they have votes they do not know how to use them. This Acous, custodian of the winds and the winds and the winds are the ended up by the wherewith to raise it, ended up by innouncing that he was in business and and hams and shoestrings, self-wring-ing mops and macaroni, more cheaply than any one else in Boston. Therefore the working class does pay the taxes.

A quasi-member of the S. L. P., known as the "East Wind." now wreathed his lithe proboscis" and blew a mighty blast: "What does the ques-tion man? Why food activity and migaty blast: "What does the question mean? Why, food, clothing and shelter. You will find it all in Engels' Equality. Harry Lloyd, at the Central Labor Yewneean threatened to thrown me out the window. So much food, clothing and shelter. I tell you these may be honest, but they ain't got the committee of the co mics of Karl Marx's Capital the way Comrade 'West Wind' and me has. It is the law of values, these surplus values is, and there ain't no difference if you look at it from the scientific standpoint. Now me and Comrade 'West Wind' has got things in our own hands, and do you suppose we are going to let things slip through our fingers?

"O, wild 'West Wind'-thou breath of

Autumn's being." "East Wind," she exclaimed, "you are an idiot. That is the negative position." He looked at her in a fat-eyed way, but at last managed to say with that clean-cut, search-ing, brilliant wit for which he was in-famous, "Am I? No I ain't either. So are you." Then they fought lovingly for half an hour as to whether he had assumed the negative position or not. "West Wind," garbed becomingly in the serene authority of knowledge, began to weep, and a little breeze from the Suthard of South Boston tempered himself to the shorn lamb, and threw his bat into the sir and cheered: "I love beautiful things, the working class loves beautiful things," he shouted. She received the compliment with becoming modesty, and bowed to, and smiled at him, whereupon he again was thus suspended it contained just as

much as it did when its owner wore it.

There was one gentleman present who had a little fault to find. He was a strange-looking wind, and at one time his constant occupation was in being thrown out of Section Boston, in order organized, he found to his surprise and sorrow that monkey-shines would not be tolerated. He founded the club and raised most of the money to carry it on, but the new winds would not even allow him to speak. He tried to get the floor, but the "West Wind" was already on 'West Wind" was already on her feet, and was blowing at the rate of three hundred miles an hour. She wore, as is her custom, a bunch of sun-flowers and egg-plants. She was a strange compound of misunderstood Emersonianism and Buddhism, which she received from some theosophic charlatan. These ideas, interwoven with a theory of vibrations which would make Hartley turn in his grave, formed an exceedingly imposing, but withal in-digestible and un-nutricious mince-pie. The founder, who was not allowed a place in his own club, managed to offer an amendment to "East Wind's" point of order: "Is the question under dis cussion, and if so why not?" She waved him aside and spoke as follows

'Society demarnds that the imperial diadem of sovereignty be plarnted upon the brow of American citizenship, in contradistinction to those who vote. We hold that in the economic evolu-tion which begarn with the French Revolution five hundred years ago, this is not so. Now here are your two poles. What do they say to you? Why thart is a question which would carry us far into arbstract tarngibility and must not be premeditated. Aristotle, the fa-mous German contemporary of Marx, did not assume the positive position. Thus he lost the concrete grarsp of which are essential to the authority of knowledge. For this reason, by the united faith of our achievement, we must starnd forth arrayed for the larst grand means. larst grand menace. The ardvarn-tages of the franchise, wrested by the harnds of our revolutionary forefathers says to every citizen: You have vitia-ted the economic base of the fundamental principle. You, who in your own right, is the inherent peers, connotes the desire of the future. Spurred on by the vibrating aspirations of the past, you should hold aloft with un-flinching harts' hearts the unsullied flarg, which is your prime motive. MY Revolutionary forefathers, in that desperate struggle, filched from the tyran-nous harnd of usurpation the underlying farct for which they bled. That is only another way of saying that in the onward march we are forced to say just what it means by circumstarnces. I can see here from the deck of the staunch sea-going ferry boat, 'City of Chelsea,' the mediæval surroundings of their position, for me own family came of fine, old New England private and I can remember when my fathe said during the Maxican war: 'An son of mine belongs not to unless he strikes at this hour. who are no son, but a daughter and an only child, you, too, have juty to your native larnd.' And I arose, young as I was, and in those stirring days of the war of 1812, when my kith and kin rushed forth against the South for their homes and families. But times change and I would offer a suggestion, if I may be permitted to rise to a question of personal privilege by appealing from the decision of the chair. That we organize a society for the conversion of ex-presidents of the United States to Socialism. We will need \$2,000,000 to pay party wages, and I would suggest that the first three hundred persons replying and enclosing sixty stamps be allowed to contribute \$2,000 each. This, Mr. Chairman and Citizens, are the program of the philosophy of Socialism."

There was also in the course of the address a certain poor, hard-working woman who was forced by evil fate to turn over and over and over in the solitary and lonely hours of the night a five dollar bill which was not more than that sum. I had heard of this woman so often that I did not believe in woman so often that I did not believe in her, but she again bobbed up still turning over that five dollar bill. She should turn it over to "West Wind" and have done with it. The general style of the oration was peculiar, but spoken it was pure—nay, classic, English compared with the orator's written words. Because of the fact that she could not write ten coherent words she words. Because of the fact that she could not write ten coherent words she aspired to edit a paper, and one of her standing grievances was that the Conrades would not supply her with papers to edit. She also had a habit of rushing into the capitalist press and trying to knife the party by writing on Socialism. Editors have no conscience, and her matter was usually accepted. and her matter was usually accepted because anything that is a burlesque of Socialism is never amiss. Such little eccentricities as a subject agreeing with its verb in number, or even a subject at all, active verbs governing the objec-tive case, were all above her serine

While she talked the others were as silent as a burglar alarm. They all had their own little discussions, and they could put a better argument if they were ignorant of what had been said. One little knot of men made the air green with a discussion of the sex ques-tion. Another bandled back and forth a small stock of Spencerian linguistic soap bubbles—in the name of science.

The club was formed for educational purposes, and it ran full blast until after election. Why did it not con-tinue? The vote in Massachusetts answered that. To-day the winds will tinue? blow as they list, but the cave is near dissolution. The winds will sigh and moan around the meetings of Beefy Mills, the Anarchist Club, Wells Mills, the Anarchist Club, Wells Memorial, and when the campaign is on again they will exercise their great art of blowing in the workers' eyes. It had a few members under the spell of the West Wind," and as a speller she is "West Wind," and as a speller she is horrible. They watched and they waited for developments, and when they came they started to cry: "I did it." We also watched and waited, and the bluff did not work. They knew that the thrones of the S. D. P. were all occupied, and they knew that the S. L. P. had none and no other seat is comfort. had none, and no other seat is comfortable to them. The kangaroos faded into far-off, musty smell, and there also another hope was lost. Massachusetts has changed hands for the better, and this year's stalking-horse, the Cave of the Winds, is hermetically sealed. This is its obituary.

The Daily People For July lat, 1900.

On Monday, November 26th, took place a most important meeting of Party members, called by the Daily People Conference. That meeting must be looked upon as the practical start of

THE DAILY PEOPLE.

From the time when the necessity of a daily Socialist paper became apparent, from that moment of conception, the sentiment grew, gaining in extent and intensity, until now, when in the So-cialist Labor body politic, the physiolo-gical changes necessary for the coming more complicated and more important life, have been accomplished, the period of gestation has ended and the birth

process has commenced.

The meeting, which was well attended and representative of the abler and more active element of the Party in New York and New Jersey, was presided over by Comrade H. Simpson. After some introductory remarks, the chairman called upon the Daily People Conference to present its plan. The plan consisted of two portions:

First, the amalgamation of all the offices of the Party, of the S. T. & L. A., the Labor News Company, and of all the Party printing establishments into one building, with one printing estab-lishment, large enough to do all the present printing work of the Party, including a daily paper in the English language.

Second, that various subdivisions of the Party in Greater New York and vicinity undertake to obtain pledges from their respective memberships for various sums, the same to be collected by these organizations in part payments, to be made weekly or monthly, and to be credited for with stamps and books now provided for by the Dally People Conference, while the Party organizations outside of New York are to be charged with the collection of the sums amortioned to their respective sums apportioned to their respective vicinities

Both of these provisions of the plan contemplate the issuing of the DAILY PEOPLE in time for the next Presidential campaign.

The second part being the main object, it was discussed first. The point was scored that the election returns gave the lie direct to the claim so often advanced in former years by the "Volkszeitung" that it "did it"; and that the Party vote was essentially German. The election returns this year proved that the Party vote was essentially American and of Americanized elements; and that the 14,000 and odd votes of Greater New York was a guarantee of at least 23,000 English readers right here, to say noth-ing of the adjoining districts of New Jersey, etc. A motion was thereupon unanimously and enthusiastically carried that: "It is the sense of this meeting that the DAILY PEOPLE should and be issued on July 1st, 1900, and that the National Executive Committee of the S. L. P. take the necessary steps in carrying out, said object."

A committee composed of Comrades Cooper and Siff, of New York, and Campbell, of New Jersey, was elected to bring before and urge it upon the National Executive Committee.

The portion appertaining to the amalgamation of offices and printing establishments being considered dependent upon the adoption of the above by the National Executive Committee, it was referred to same committee to look about for a suitable building and to remark the City Executive Committee. port to the City Executive Committee the figures as compared with those paid for rent now. That portion of the plan referring to the manner of collecting funds was also carried.

A collection to defray the expense of the meeting was made, and realized \$15. Comrade D. De Leon was then called upon to address the meting. In the course of his remarks he pointed out the importance of the late incidents within the Party to the Party itself, as comprehended by the cries of the canual. seen reflected by the cries of the capitalist press on the subject of this country's politics, of which the S. L. P. had now become an integral part. The speaker also pointed out that the Party's Eng-lish daily would start with an editorial and reportorial staff—drawn from all parts of the country—that would eclipse all other dailies, and from the start secure attention and respect.

A motion was then made and carried that members present pledge them-selves to sums of money for the DAILY PEOPLE, these sums to be turned over to the respective sub-divisions for col-lection. During the collection, the chairman, followed by Comrades Carless and Campbell, addressed the meet-ing. The pledges at this meeting amounted to \$1,211.75, which, with previously aunounced \$380 from the 32d A. D., brings the total up to \$1,591.75. The announcement was greeted with tre-mendous applause, with which the memorable meeting wound up.

Socialism, with the Nazarene, spurns as futile, if not wicked, the method of cajolery and seduction, or the crying of "Peace, prace," where there is no peace, and cuts a clean swath, while reform is eternally entangled in its course of charming, luring, decoying.-From "Reform or Revolution."-See advertisement

Property Qualifications in Rhode Island.

To THE PEOPLE.—Replying to the query of S. F., New York, in THE PEOPLE of the 19th instant, following is the section in the Rhode Island constitution on the qualifications of electors.

"Svery male citizen of the United States of the age of twenty-one years, who has had his residence and home in this state for two years, and in the town or city in which he may offer to vote six months next preceding the time of his voting, and whose name shall be registered in the town or city where he resides on or before the last day of December, in the year next preceding the time of his voting, shall have a right to vote in the election of all clevil officers and on all questions in all legally organized town or ward meetings: PROVIDED, that no person shall at any time be allowed to vote in the election of the city council or any city, or upon any proposition to impose a 'tax or for the expenditure of money in any town or city, unless he shall within the year next preceding have paid a tax assessed upon his property therein, valued at least at one hundred and thirty-four dollars."

Under this provision a voter must pay a tax Every male citizen of the United States of

at least at one hundred and thirty-four dollars."

Under this provision a voter must pay a tax upon \$134 worth of real or personal property in order to vote for members of the Board of Aldermen and Common Council in cities or upon any proposition to impose a tax or for the expenditure of money in town meetings in towns. The Board of Assessors in cities or towns reserve to themselves the right to say whether a person's name shall go upon the personal property list even though he swears he owns \$154 worth of property, and thereby they endcayor to see that their particular party remains dominant.

The attempt to extend the property qualification to elections for all offices and also to ingerease the amount of property on which a tax would have to be paid, was made by some members of the commission selected to prepare a new constitution or revision of the old one, and drafts covering their ideas were offered for adoption by the commission, but they were not accepted, as the majority of its members well knew public sentiment was against them.

TO THE PEOPLE.—Enclosed is list of subscriptions. Shall keep work agoing. I embrace every opportunity that presents itself to teach the miners of this vicinity, that all the wealth that is in the world has been produced by labor; that to the laborer rightfully belong all the products; and that the only Party in the world to-day who can and WILL secure to the workman the full product of his labor is the SOCIALIST LABOR PARTY.

I addressed a mass meeting of the miners of this county a few weeks ago on this subject; I am pleased to find that it is bearing some fruit.

I am glad to see from the election returns that you have it. support of the entire Party throughout the country, you must assuredly have a just claim to it. I contend that THE PEOPLE' is the Bradlaugh paper of America. You are to the labor cause of America what Bradlaugh's paper was to the freethought movement of England.

May THE PEOPLE live long and continue in the good work it is pushing so vigorously.

Inextricable Contradictions that
Anti-Party Folks Run Themselves Into.

TO THE PEOPLE.—In the last issue of the
Brewers' Journal' there appears a call,
which all the Kangaroo papers are asked to
opy and answer.
This cell by

"Brewers' Journal" there appears at call, which all the Kangaroo papers are asked to copy and answer.

This call is for a "Untited (?) Socialist Party," and is signed by the irrepressible F. G. R. Gordon. The Kangaroos are admonished to do the only thing left for them to do. viz., "join the S. D. P. (Debs' party)" or sink into oblivion, for, as Gordon truly remarks, "the bad DeLeonites have captured everything worth having."

Out west the Kangs' followers have the wn off the mask much quicker than further E.st. The last "Class Struggle" is a veritable "Debs" number. But to return to the "Browers," about two months ago the National Secretary, Jul. Zorn, of the Brewers' Union, visited Louisville, and was, of course, immediately "interviewed" by the wicked S. L. P. bosses here. Zorn is personally a pleasant man to talk with; but his position regarding the S. L. P. and S. ". & L. A. is simply illogical and inconsistent. He declared openly that in PRINCIPLE the S. L. P. and S. T. & L. A. were IMPREDNABLE, but that the Brewers' Union, though being a CLASS-CON-SCIOU'S REVOLUTIONARY organization, had for THE TIME BEING still to adhere to the REACTIONARY A. F. of Labor, for opportunistic reasons SOLIELY (!!); and that the for THE TIME BEING still to adhere to the REACTIONARY A. F. of Labor, for opportunistic reasons SOLIELY (!!!); and that the A. F. of Labor. AS ROTTEN. INCONSISTENT, and CORRUPT as it was (these are his own words), could still OCCASIONALLY help the brewers win a strike, which the S. T. & L. A. could not yet do. (!!!!)

You class-concious Socialists, listen to such twaddle; and then compare the same with the remarks of your ignorant Republican or Democratic friend who says he would also be with us, BUT WE ARE NOT YET STRONG ENOUGH!

or Democratic friend who says newood allow be with us, BUT WE ARE NOT YET STRONG ENOUGH! Which Comrades, do you consider the worst of the two: the one a leader of a so-called class-conscious economic organization, claiming to know all that it implies, and the other as yet totally ignorant of both the word and the meaning of it?

In the same "Brewers' Journal" another contributor, Trautman of Springfield, Mass., in a tapeworm article, which ran through sive consecutive copies during as many consecutive weeks, writes the history of the "Rise and Fall of the S. T. & L. A." Like Zorn, Trautman is also constrained to declare the Alliance principle to be bed-rock, but he attributes its "downfail" to the organization of "rival unions." The big joke of his whole article comes in when he tearfully says that he stands to-day "sorrou fully at the grave of the Alliance, which might have been the redeemer of the American proletariat," and then concludes saying that in New Jerrey, Rhode Island, and Massachusetts the Alliance has been so deeply planted that he fears it can never be destroyed. So, after all, it is a pretty live corpse that Trautman has "burief," and the wicked Socialists can again exclaim. "Consistency, thou art a jewell" to which I add, "among the brewers."

"Better Socialists Than You."
TO THE PEOPLE.—Our vote in precincts where the Comrades of Section Houtzdale live, has increased from 39 last fall to 59 this fall.
The Houtzdale Comrades are greatly indebted to the correspondent signing himself C. A. D. for so thoroughly exposing John R. Paisley of Osceols, Pa. This same fellow has about six months age declared to one of our comrades that he believed in Socialism, and that it was a good thing, but—he objected of our speaker going there, claiming the time was too short to call a mass meeting of the miners.

Again when Section Hautzdale

Again, when Section Houtzdale wrote to him bout a week before Comrade Schuliberg was o speak there (this time he had enough time), f, as he claimed, he believed in Socialism to all the mass meeting. But he never even an-wered our letter; we now know the reason

why.

We have one of similar type in Houtzdale
by the name of P. J. Drain, who is also a
Demo.-politician and claims to be a "better
(") socialist than you." This same man proposed last spring to some of our members
that he would barter and trade one of his

Demo.-votes for every one of the Socialist vote that we would give him. Our Comrades informed him that the S. L. P. was not in the gambling business with its votes.

Comrades, beware of these fakir-freak Socialists; they will do all in their power to keep the light of Socialism from the workers.

Reactionists Dumped in Detroit Also.

TO THE PEOPLE.—The report about our vote comes rather late. This could not be helped. We had to wait until the official count was completed before reporting.

Herman Richter, the S. L. P. candidate for Mayor of Detroit, received 303 votes. At the fall election of 1858 Herman Richter was a candidate on the state ticket for Regent of the University, and at that election be received 379 votes in the whole of Wayne county. This year Richter's vote is, therefore, 75 votes less than last year, while the average difference between last year's vote and that of this year's is a little higher.

This insignificant falling off is a stinging slap in the face of the Detroit Kangaroos. They called upon the voters of the Socialist Labor Party ticket to abstain from voting. But in spite of the fact that the capitalist newspapers here, the same as in New York, took up the Kangaroo ery, and announced that, the "real Socialist Labor Party" had decided to abstain from voting and called upor all its followers and sympathizers to do lik, isse so as to show the weakness of the "Meyer faction," and in spite of the fact that "grand mass meetings" when the weakness of the "Meyer faction," and in spite of the fact that "grand halls to explain why the S. L. P. should be boycotted; in spite of all that the S. L. P. voters of Detroit repudiated Kangarooism by voting for the S. L. P. ticket.

As to their "mass meetings," why, there were just 12 men present on November; 5th at their largest opposition meeting, held in the large lower hall of Arbeiter-Halle, and among these 12 men, were two of the members of the S. L. P. who had gone there out of curiosity. So arxious was the combination of Kangaroos, capitalist papers and politicians to wipe out the Socialist Labor Party vote here, that they tried to count us out when it was becoming apparent that the voters had not obeyed their request.

When the writer of this report called at the booth of the 5th Precinct, 13th Ward, to find

(No questions will be considered that come in anonymous letters. All letters must carry a bona fide signature and address.) C. P., PHOENIX, ARIZ.-While your article

on the Transvaal is correct enough in its as-sault on England, it is incorrect in its un-qualified sympathy with the Boers. The rul-ing class among the Boers is a class of ex-ploiters of workingmen. Kruger himself is worth millions. Where did he get them?

worth millions. Where did he get them?

R. S. J., BOSTON, MASS.—That is also a misconception. The Alliance no more sacers at "union labels" than it sucers at "unionsm." The Alliance does, however, not suceronly but merclicasly expose false "unionism". "Unionism" is execrable and must be smashed where it is not in the interest of the working class and is an appendage to the mechanism of capitalist society. Unionism is excellent where it is in the interest of the working class, consequently revolutionary. So with the label. Where the label is so used as to protect the workers, it is good and will be utilized; but where the label is study used to protect the employer there it is pestilential. Chew upon this.

Y. W. R., BALTIMORE, MD.—There is no denying it; the Kangaroos fought with a good deal of vigor. And in that lies one of the counts in the indictment that pronounces them poltroons. Had they put forth half as much energy in fighting the fakirs in their organizations, instead of cowering before them, fakirism would not be to-day the curse that it is to the workers.

C. T., HOBOKEN, N. S. D. T., NEW YORK.—Bother! The "Bogus" is a give-away.

W. R. D., BOSTON, MASS.—Several passages in that letter contain statements unfair to comrades. As the letter was signed and had already appeared in the "Travelier," the bluepenciling of such passages could not be done with propriety. Moreover it is not just to Comrades Keinard and Molloney to ignore the valuable services done in Mariboro by them. All honor to whom honor be due; let us never forget that the honor, raised by depriving others of their due meed, stands on shaky props.

S. F. L., NEW BEDFORD, MASS.—That article will have to be re-written. If the capitalist class is so sall-fired powerful and the economic organization is so all-fired weak, does it not strike you that it is illogical to conclude that THEREFORE the Socialist Trade & Labor

Alliance is the thing for the men to go into The weakness of the old union does not lie in its being an ECONOMIC organization: if so, there were no sease in organization the Alliance, which is also an economic organization essentially, if not exclusively. The weakness and helplessness of old unionism lies in that its economic and sociologic groundwork is false. That groundwork ignores the class-struggie, ignores the nature of the merchandise "Labor." ignores the meaning of the word "Capital." Consequently it moves wrong at every tep, and finally falls a dupe to the fakir. The groundwork of the Alliance being sound on all these heads. IT can be a protection to the workers. The necessity of voting right, class-consciously, on election day is but a result, a very important one, no doubt, but yet merely a result of the sound economic and sociological groundwork of bona fide unionism. Such unionism can be powerful; the other is worthless.

"Capitalism and Productive Labou" before seeing it. The speech you kindly sent for publication was crowded out by other matter of immediate importance. Shall mail it back.

F. NEW HAVEN, CT.—See notice on the subject. Ladies are, of course, admitted to the jolification banquet. If you don't know any joke on the Kangaroos, go balves with some one who knows two.

G. W. F. EAST ST. LOUIS, ILL.—That's no way of reasoning. Of course, if Bryan is a Socialist "doing the right thing now," then the conclusion is right that he should be supported by the S. L. P. But are your premises correct." That's the first thing to settle, Now the facts deny your premises. Bryan is no Socialist.

the facts deny your premises. Bryan is no Socialist.

In the first place, the Socialist knows that the more concentrated production is, the mere plentiful also it is, and the less labor is needed; and he knows that the Trust is such a concentration. Accordingly, the Socialist does not seek to "smeah the Trust", he seeks to nationalize it, and in that way strip it of its bad feature. Bryan, on the contrary, wants to smeah the Trust, and thus set civilization back. In the second place, Bryan is the pet, being the nominee of the silver mine barons, who shot down their employes, and of the railread magnates who caused Cleveland to send the military into Chicago to break the Pullman strike.

Many more facts could be adduced. These will suffice. Such people are no Socialists and oppose Socialism. The Socialist Labor Party is not a brainless bird to be caught with bird-line.

is not a brainless bird to be caught with piruliries.

"SIMS," HOLYOKE, MASS,—The "1899," over the second column in last week's report of the vote in New York County, was a typographical error. It should read "1888," The vote this year in Greater New York will fall barely 900 below last year's vote, if that much:—and that is the sum total of "Volkszeitung" induence under the most favorable conditions for mischief. In two counties of Greater New York, Kings (Brooklyn) and Richmond this year's vote goes up, and so 'tt did in the 16th A. D. of New York—291 votes.

CHICAGO, ILL.—The reason that gentleman is violent is that he and some others like him imagined that their successive withdrawais from the Party would have the effect of a series of earthquakes. In point of fact, they had no more effect than the successive falling of so many peas. Is not that reason enough to make as man violent? Is not such lack of appreciation on the part of the Party a disguating manifestation of billingsate, and a shocking display of bossism? Think it over, and be fair.

Think it over, and be fair.

"YOURS TRULY," ST. LOUIS, MO.—The recent struggle in New York and the grand results thereof has had an excellent effect on the membership. The necessary thing of permanent and proper headquarters in each Assembly District was formerly a matter of long and protracted debate. It never could come to a head. The "Genosse" saloon-keepers in the rear of whose saloons the meetings used to take place, always managed to balk every plan to move and set up permanent headquarters. This was notoriously so in the two New York Kangaroo A. D.'s par excellence, the 28th and the 30th. Now both these A. D.'s have their own headquarters.

R. LITTLE FALLS N. Y.—The Social Ones.

B. LITTLE FALLS, N. Y.—The Social Question is a jealous mistress, and oftimes her conduct seems cruel towards her one-time devotess. She demands unswerving devotion, and punishes relentlossly the slightest unfaithfulness. He who does not know that, and, slipping, feels her lash, can not complisin without convicting himself of puerile ignorance. His the blame, and no one else's.

T. "EXCELSIOR," CLEVELAND, OHIO-Of-course, if Bandlow had any sense of honor, he would have resigned from the ticket the moment that he kangarooed. But these peo-ple, as Frank McDonald put it last week, "lack a sense of humor, a sense of honor, a sense of shame—SENSE."

A. M. D., CHICAGO, ILL.—Last year's S. L. P. vote in the Jewish districts of New York County was 2,836; this year's vote was 2,628—an increase of 183. The Jewish element is an increase of 183. The Jewish element is enancipating itself of the incubus of Jewish charlatans that looked upon the Jewish workingman as their private preserve. Study the figures in Greater New York carefully. The increased S. L. P. vote in Kings and Richmond Counties also tells a big tale.

E. O. C., DENVER, COLO.—With the S. L. P. in power, the Government bonds will be worth just-0.

S. H., PUEBLO, COLO,—Just keep it up, Such clippings can always be used here. Sometime, somehow occasion arises to ram the passages down the throat of their utterer.

F. B., PEORIA, ILL.—Your letter demonstrates conclusively that either the correspondent of the "Bogus." G. F. SCHMIDT, of Pikin, Ill.. is a scamp or that the "Begus" is the matter worth the space! Would not such proofs be like carrying coals to Newastie? No honorable man, if he is same, and no same man, if he is honorable, any longer attaches the slightest importance to what appears in the "Bogus"; moreover, hardly anybody reads the thing any longer.

H. H., OMAHA, NEB.—It matters not how

the thing any longer.

H. H. OMAHA, NEB.—It matters not how "atrong" the enemy may seem to be. The "strength" of capitalist error is only in seeming. Persistently holding up the terch of Socialist science is bound to reveal the errors of those who uphold capitalism. Error can not in the end prevail against the steady rays

of the body of the standy rays of reason.

J. D. NATIONAL EXECUTIVE COMMITTEE.

Regular meeting of the National Ex-ecutive Committee held, with Patrick Murphy in the chair. Absent Keep and Sauter, the latter without excuse. The financial report for the week end; ing November 25th showed receipts, \$30.90; expenditures, \$81.06.

\$30.90; expenditures, \$81.06.

A committee, elected at a mass meeting called by the Daily People Conference was present, and placed before the National Executive Committee a proposition passed upon by said meeting, namely, that a daily Socialist paper, printed in the English language, be started on July 1st, 1900, in the city of New York, and that a call be issued to the Socialist organizations. issued to the Socialist organizations of the land to raise the necessary funds. After an exhaustive discussion of the matter, it was resolved to concur, and a sub-committee was elected to draft the call to be submitted at next meet-

ing.
Section Everett, Mass., reported expulsion of Frank P. Finnegau, for having kangarooed.

The Secretary, in explanation of the charge of \$6 on the financial report, stated that William Edlin, formerly in York, and now in San Francisco, come to him in the tall of 1897 and asked for an advance of \$12 to see him through an agitation tour for which he had been engaged by the which he had been engaged by the Comrades of Massachusetts, promising to refund the money upon his return, when Massachusetts had paid him That Edlin failed to refund the amount for the alleged reason that he had been compelled to make some purchases, and had used the money himself. The Sec-retary stated that he had succeeded in collecting one-half of the amount, the last payment of \$1 having been made on Oct. 1st, 1898, but that since then Edlin had ceased to pay anything, and had not replied to letters sent him in regard to this matter. In view of the fact that there was no chance of collecting the \$6 still due from Edlin, the latter having kangarooed just as soon as he found that his application for employment as an organizer, either by the National Executive Committee or by some Eastern State committee, had not had the desired effect, the only way to dispose of this matter was to charge the amount to the National Executive Committee. Approved.
